Principal's Report

The old Chinese curse, 'may you live in interesting times' comes to mind when I reflect on education across the country over the last year. The year 2006 certainly has been an interesting one, yet I hope that rather than a curse it is the beginning of a strong resurgence in the valuing of education and training, particularly in Tasmania.

Across the State and the country we have witnessed the political debate about curriculum, completion certificates, retention and assessment. We have witnessed the Federal Government advocating a national curriculum and in our State we have experienced significant attention on the Essential Learnings.

In spite of these external issues, the Launceston College tradition of remaining focused on students' needs has resulted in continuous improvement.

We are constantly aware of the physical environment and its need to be conducive to learning. This year we have witnessed the redevelopment of the College theatre as a result of an 'Investing in Schools' submission – this new facility is being used extensively across the learning areas.

During the year the new Photography Studio came into usage as did the extensive ICT computer section in the Launceston College Library. The latter being a significant addition to student research and study options.

Before the year ends the redevelopment of our Hospitality facility, including Elcie's Restaurant, will be underway, as will the completion of the student meeting area in the Undercroft.

The social and emotional environment has been extremely positive – a combination of formal student support programs, high level interaction across staff and students, extensive yet low level supervision complemented by a collaborative, mature student body. Launceston College is a college of rich racial diversity, one in which students interact more harmoniously than any other school in my experience.

You will notice in this **Churinga** the Global Gourmet Day, an annual event in which we share the culinary delights of our students' countries. The participation in this event involves students across the College as well as parents and the community and is characteristic of the respectful environment in which we are fortunate to work and learn.

This year too, our production of **Hair** included students from our international group. **Hair**, like **Grease** and **Footloose** before it, was an outstanding success. Each year well over 100 students perform to a total audience in excess of 6000 – the Launceston College Production is a major event on the local theatre calendar.

2006 also saw the initiative that is **Info Expo Day** for students, an event in which a multitude of service providers and community groups stage an Information Exposition for students. This year the Expo ranged from Electoral Commission to Police Force Recruitment and Union representation and was well attended by students.

Our Student Representative Council, though small in numbers, is large in heart and I congratulate this group for their significant contribution inclusive of involvement with the College Association and their work in facilitating College events.

This year our students continued to excel in all areas of their endeavours. In the Launceston Competitions our students excelled against all public and private colleges. Further, to name but a very small number of individual successes:

- Lili Andrews and Ashton Maher reached the State Finals of **Storm the Stage**.
- Rheanna Chenhall was awarded the gold medal as top VET Building and Construction student in **Australia**.
- Andrew Dicker was placed in the top 1% of students in Australia in the National Chemistry Quiz.
- Jessica Griffiths won a scholarship to Germany in 2006 and France in 2007.
- Anthony Nelson received a High Distinction in the Westpac National Mathematics Competition.

There is then obviously outstanding student talent as well as teacher expertise across the range of education and training. That combination of student talent and teacher commitment is characteristic of this proud College, and the resultant outcomes are enhanced by a support staff with significant expertise and commitment to students and this College. I thank them all.

I will finish this overview with a challenge – in a State where in less than 6 years there will be more people leaving the workforce than entering it, how can we, community and schools, ensure that each and every student that enters our colleges leaves with a qualification that enables them to contribute positively in our rapidly aging society?

It is a challenge we must address.

Wall used with special permission of the College Association and DOE. Do not attempt to replicate this stunt between the hours of 8.20am and 4.00pm school days!

President's report: The year of living introspectively

This year's SRC did not seek to conquer the world with a revolutionary youthful approach to Global Warming, Conflict in the Middle East or Third World Hunger. This council, although small in number, did not wish to push these ideas aside, but sought to recognise that there is often too much to do and very little time to be able to meet an achievable ends. This was the year of school based introspection.

When one has the opportunity to realistically approach an extremely compact calendar year with an absolute plethora of ideas and contributions, chaos and logistics minimise effectiveness. The SRC acknowledged this and decided that this was not the sort of message we wished to leave behind. One completed task is a far better beacon of success than many unfinished projects despite the best of intentions.

The initial recruitment of the SRC saw a group of young people come together with very similar ideals and experience as 'young leaders.' This leadership potential was quickly realised by the organising at very short notice of a presence at the **Relay for Life**. Launceston College donned some very 60's styled clothing in an effort to cross-promote the upcoming production of *Hair*. The monies that were raised from this went to the Australian Cancer Council in their bid to find a cure for cancer. Like, groovy, baby.

It has become something of a Launceston College SRC tradition to be at the **Global Gourmet Day** with free Vegemite on toast to fill the void after sampling the international foods. To many, the flannelette shirts with sleeves rolled up to the elbow wiping sweat from the brow after fervently buttering hot toast for masses are at least as elegant as the Geisha with their platters of sushi. Well, maybe not.

Despite the fact that the year was quickly running its course, in all of our self-righteous zeal we had failed to get to know our fellow SRC members. Our leadership expedition held at Grindelwald Resort taught us many a thing and in particular who on the SRC has the best (or most effective) golf swing. Without this vital knowledge I doubt our meetings would have ever have been the same. Our meetings would also have not been nearly as efficient without the lesson on formal meeting procedure kindly taught to us by Gary Bensemann. The greatest benefit to the SRC came from Natalie Heiniger and even though we may not have thought that her brain teasing problem solving task had a solution, it taught us the wonder of open discussion and idea lobbing into the far corner. As it turned out, there was a solution and it wasn't a trick question much to our incredulity.

Our year of introspection included turning our eyes to the student populace. Although most students would like their SRC to ban all classes and ensure a regular supply of free food for them to eat in front of the telly, we decided that this perhaps was not the best way to encourage students to socialise and interact with their peers from other faculties of the college. This years Inter-College Day was hijacked as the best possible time to host an inter college social which would promote inter college rivalry and take it to the dance floor. The **Let your Hair down Dorothy** social was the love child of the Launceston College and Newstead College SRCs who through extensive collaboration managed to host a very successful social. It was so successful, in fact, that more students attended than originally anticipated and regretfully capacity was reached prior to all students being permitted entrance. For future reference, may it be noted, that yes, we are going to need a bigger boat ...

The student council is often a hiding place (or a forum, depending on your perspective) for those who are either politically aware or even those with political aspirations of their own. When two Tasmanian Labor party senators, Helen Polly and Nick Sherry, came to the College to provide insight into not only the workings of Federal Parliament, but more importantly the implications of legislations that are affecting students and young people, some interested Newstead College students came along too. This was a fantastic opportunity to find out first hand what effects the new IR laws and voting laws may have on young people. The visit also provided an opportunity to facilitate discussion of the issues that presently affect students and young people in our local community so that these federal representatives may have a greater understanding of the demographic they are representing.

Formal dining and the opportunity to unleash rehearsed dining etiquette upon your peers is an opportunity not to be missed. Also, of course, for some the chance to dress up is a bit of a highlight (for others, just another day in College life!). Yes, another **Launceston College Ball** rounded out the year with the usual extravaganza of pomp, circumstance and slightly bleary-eyed bemusement the following day.

As with any SRC, fundraising is what provides the finance to be able to host events such as the inter-college social and this year's ball. The best way to raise funds is through food. Everyone needs to eat and it is with this same premise that everyone needs to support their student council. Cadbury chocolate sales are presently doing quite well and a savvy member can polish off a box of 48 chocolates in a week. However, it is not certain how many of the chocolates have been purchased by unwilling family members and the council members themselves rather than the student body. My biology class in particular, have become quite fond of a Freddo during the lesson to tide them over until lunch. Sales are expected to continue until they are all gone by which time the council members' pantries will contain a lifetime supply of sugar fixes.

A special mention must also go to the **School Association** without whom many of our college facilities would not be in place. This year, the theatrette has been something of a novelty amongst students and staff, being wonderfully used for performances and many a lecture from visiting experts. Disappointingly, it is not widely known that the organisation behind this development was the School Association. Meetings with the School Association are only valid if a student member from the college attends, so it is a duty of the SRC to share the load and ensure there is a sitting member at every meeting. Presence at this meeting provides an opportunity to give some first-hand input into the actual running of the College (it's a scary thought really ...). Also, as tradition requires, members of the School Association get to go to the School Association end of year dinner. By sharing the load, it is hoped that all members of the SRC can wrangle an invitation this year. However, I do think that the president of the School Association is well aware of what we are up to ...

In closing, the year has left us with a feeling of muted accomplishment. In many ways, being a member of the SRC is a bit like joining a secret society. There is no secret handshake and you don't get to dress up in odd looking robes, but you do meet in quiet little rooms and plot. Despite the sense of disconnectedness this inevitably generates, the SRC as a group can be quietly proud of their achievements during 2006.

Rebekah Utting
(SRC Co-President)

This year's Aviation Studies class consisted of 2 females and 8 males. Each with their own reasons for undertaking the course, from gaining a pilot's licence as soon as possible to having a general interest in aviation. The course consists of the theory needed to undertake the Basic Aeronautical Knowledge (BAK) test, which is a requirement of the Civil Aviation Safety Authority to achieve a pilot's licence. Topics covered included aerodynamics, engines and their associated systems, instruments, navigation, basic meteorology, air law and human factors. The course is interspersed with videos on aeronautical topics such as modern and historical aircraft, air crash investigations, history and theory of flight, all of which are aimed at making the course material more real. In addition the Internet is used when required to access aviation information, such as weather forecasts and CASA regulations.

The highlight of the year for the students was a flight to George Town Airport in Cessna 172s piloted by 2 staff members where the students were given information on Sport Aviation (formerly Ultralights) by Eugene Reid the Acting CFI. Prior to take off, the students carried out weight and balance calculations on 'their' aircraft and participated in the mandatory pre-flight inspection walk around. Once in the aircraft, acting as co-pilot, reading out the pre-takeoff checklist. The students undertook their BAK examination and once they pass they can take the next step, which may not happen for a number of years. Nonetheless they have begun the journey towards the achievement of becoming a flyer.

Le Français

This year at LC, there have been 3 French classes: a Level 3 beginners, a Level 3 night class and a Level 5. The dedication and commitment of the level 5 students is remarkable. As well as regular tutorial attendance, students undertook extra-curricular weekly conversation classes in term 3 and 4 students chose to enter a statewide competition as extra exam preparation.

Students worked hard to cover the requirements of these demanding courses and made excellent progress but there was always time for music, fun and culturally-enriching activities. Students in the daytime beginners' class cooked *quiche* and *patisseries* for Global Gourmet Day and set up, decorated and served on the French stall. On Bastille Day in July, the 2 daytime classes enjoyed a visit to Le Fournil du Yorktown where *patisseries* and *chocolats chauds* were appreciated. The evening class prepared a sumptuous buffet with a variety of French culinary treats.

We were all very pleased to host 2 French exchange students in term 2. Pierre-Gilles enrolled in the level 5 class and was a great help. Vianny joined us to celebrate *le quatorze juillet* and provided tuition one week in the night class with Pierre-Gilles.

The level 5 class has been fortunate to benefit from the experiences of Grace and Caitlin who spent their last summer holidays as exchange students in France. Grace has just returned from a holiday in Noumea and Rousin from Paris. Also, in July, we welcomed Sue, a German exchange student.

French at LC is alive and well and opening up the world to so many students.

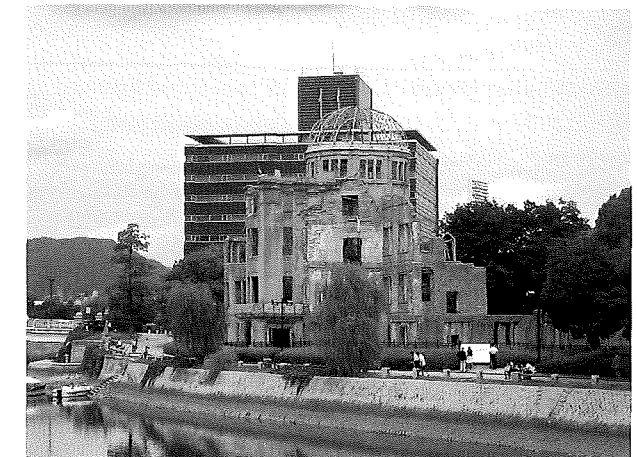

The Land of the Rising Sun...

Nine students, one teacher, eleven days, one completely different country! Hardly anyone knew what to expect when the Launceston College Japanese group consisting of Angie Dicker, Keith Crawford, Rae-Lauree Burn, Rowena Price, Andrew Dicker, Lorelle Knowles, Brigitte Mitchell, Riccardo Tedeschi, Emma Harvey and myself touched down in Tokyo on September the 10th. For many it was our first time out of Australia. The first notable thing was the heat of 36 degrees bearing down upon us, the trip was a chance for a holiday, to get to know our class mates better and of course to use a language which we had been taught but never had the chance of really speaking, reading and writing out of the classroom.

We students were exposed to new sights and means of transport; from knowing the subway system inside and out to cruising along the countryside at several hundred kilometers an hour in a 'bullet train'... even bus and boat rides proved interesting. There were vending machines everywhere selling drinks, from Dr Pepper to beer. Streets would be packed during the day and a walk down a single street would reveal at least three McDonalds stores. The traditional meals were amazing, you would wake up after sleeping on the floor with your head on a pillow filled with rice husks and enjoy a meal of rice, pickled vegetables, bean curd soup, fruit, cabbage, Japanese style omelette and some form of meat; each arranged delicately in small servings.

Most of the Japanese people were polite towards us and always seemed willing to help out foreigners. Many signs and directories were in English, helping us when translating became difficult; and at many times, the translations made no sense at all as they were poorly written. Out of the many sights visited, we students were exposed to some of the old Japan, e.g. temples and shrines; one such being the Kinkakuji, which is a pavilion made out of gold. The ecosystem was extraordinary; there was plenty of plant life in peaceful surroundings, contributing to the serenity of the places for meditation.

As well there was the modern Japan including the Tokyo anime centre (which was closed the day we visited there). It was clear how important animation was to their culture, it has basically become a religion, with stores dedicated to selling comics and fan merchandise. Visiting Hiroshima was an unnerving experience as we visited the exact place, where 61 years ago the first atomic bomb was used. The peace park erected as a site of remembrance is breathtaking, complete with statues, depicting atrocities as a result of the destruction and the last surviving building; it was amazing to see a building which had survived such a horrific explosion. Everyone was brave enough to enter the museum which went into detail about the bombing and how we are still under the threat of nuclear holocaust. I believe that what was seen in there affected everyone ... its purpose is to prevent such a catastrophe from ever happening again.

Japanese culture a long time ago revolved around 'the way of the warrior', it was clear as samurai swords were available to buy everywhere; they would have made great souvenirs ... if it wasn't for customs of course! Other sites that were visited were the giant Buddha, known to be the world's biggest wooden structure and Himeiji castle which was complete with battlements and old weapons; it was hard to imagine taking it with an invading army as it was built with all kinds of defenses, from steep tracks to murder holes for arrows and rifles.

Shopping was major as there were stores everywhere and some students managed to hire bikes to ease the weary legs and get around faster. Being from a place where crime is normal, we ensured that our bikes were secured as well as possible, but many Japanese would often leave theirs out in the open, where they weren't going to be taken!

This was the first Launceston College group to partake in such a journey, surviving nine hour plane rides and wild traffic. I would personally like to thank Angie Dicker on behalf of the group for working so hard to make the trip possible as it was well worth it, each student came back feeling like a different person as there was so much for us to take in. I highly recommend it for anyone interested in language to study it now while you are here at college ... because you don't know where it might lead.

By David Claridge

Athlete Development

This year the group (a talented lot) have trained very hard. Some of the improvements in conditioning have been fantastic. The classes experienced a variety of fitness activities in local gyms including: Boot Camp, RPM, Pump, Titan Circuit and Boxercise, to complement their weekly training at college. On all occasions the effort and enthusiasm was notable, but more importantly some excellent feedback at the venues about the behaviour, maturity and skills of our college. It makes us very proud to be working with such quality students.

Some achievements that require recognition in the class include:

Daniel Ritchie – Launceston Basketball Association A-Grade Rookie of the Year

Geoff Cassidy – Tasmania Rep in the National U20 Cross Country Championships

Luke Wilcox – State U/18 Rugby representation

Tahi Wilcox – State U/18 Rugby representation

Kylie Jones – State U/18 Touch Football, State U/18 Cricket rep and state & U/18 Soccer selection.

Shaun Collis – State U/16 AFL representation.

Clay Murfett – Spent term two training, racing and riding (cycling) in the USA and is looking promising for a professional career.

Daniel Hillier – Along with Alex Males and Chris Acuvera ALMOST (1 stroke) secured the state schools Golf Championship for our college.

Caz Robinson, Ged Egan, Gino Fratangelo

Sporting Hall of Fame

*The following students have represented Tasmania
in the following sports in 2006*

Kristen Legrand	Athletics – Cross Country	Hayley Kerrison	Netball
Geoffrey Cassidy	Athletics – Cross Country	Natalie Shelton	Rowing
Cameron Witt	Basketball	Sarah Bennett	Rowing
Evan Bartush	Basketball	James Nesbit	Rugby
Zoe Mitchell	Basketball	Tahi Wilcox	Rugby
Stephanie Curtis	Basketball	Luke Wilcox	Rugby
Kylie Jones	Cricket	Erin Turner	Swimming
Thomas Robinson	Cycling	William Guy	Soccer
Alex Grima	Football	Kylie Jones	Soccer
Alexander Males	Football	Kylie Jones	Touch Football
Shaun Collis	Football	Andrew Godfrey	Touch Football
Timothy Mohr	Football	Emily Hudson	Touch Football
Alexander Males	Golf	James Buckingham	Trampoline
Jennifer Taylor	Lawn Bowls	Christopher Acuvera	Ten Pin Bowling
Bree Mountney	Netball	Lauren Hepburn	Tennis
Stephanie Green	Netball		

VET Sport and Recreation

In 2006, the VET Sport and Recreation class consisted of 16 students, two of those students also studying Outdoor Recreation Cert II. During the year the class has taken part in several community activities relating to the Sport and Recreation industry. VET Sport and Recreation has given people the opportunity to get an insight into future career pathways. Some of these pathways are Personal Trainer, working at recreational facilities, PE Teacher, Fitness Instructor, Swim Teacher, Coaches, Recreation Officer and sports retail work.

By **Tom and Geoff**

Community Coach Training Course

During first term, our VET class had partaken in being trained up for the Community Coaching Training Course. Over two weeks Ralph Morris, the co-coordinator in the north, trained us up to take children from Mayfield Primary School over a four week period. During those four weeks we took the 25 or so children for a variety of sporting activities including: Octopus, Fruit Salad and Rounders which gave an enjoyable experience to the kids and us.

By **Daniel and Joel**

LC Sports Afternoon

On Tuesday the 23rd of May our VET Sport and Rec. class held a sports afternoon for other college students. The sports that were on offer were basket ball, soccer and squash. We all learned how to work as a team and about how much work was involved in running and organizing something like this. Everything ended up going according to plan on the day and the afternoon was a complete success.

By **Tim and Ash**

Work Placement

During the year students from our VET Recreation class took part in three blocks of work placements. The placements were all situated in the Launceston area and included gyms, school's, swim schools, retail stores and other recreational organisations such as LISA. Through these placements students have gained experience in working within the Sport & Recreation industry, which will hopefully better prepare them for future employment.

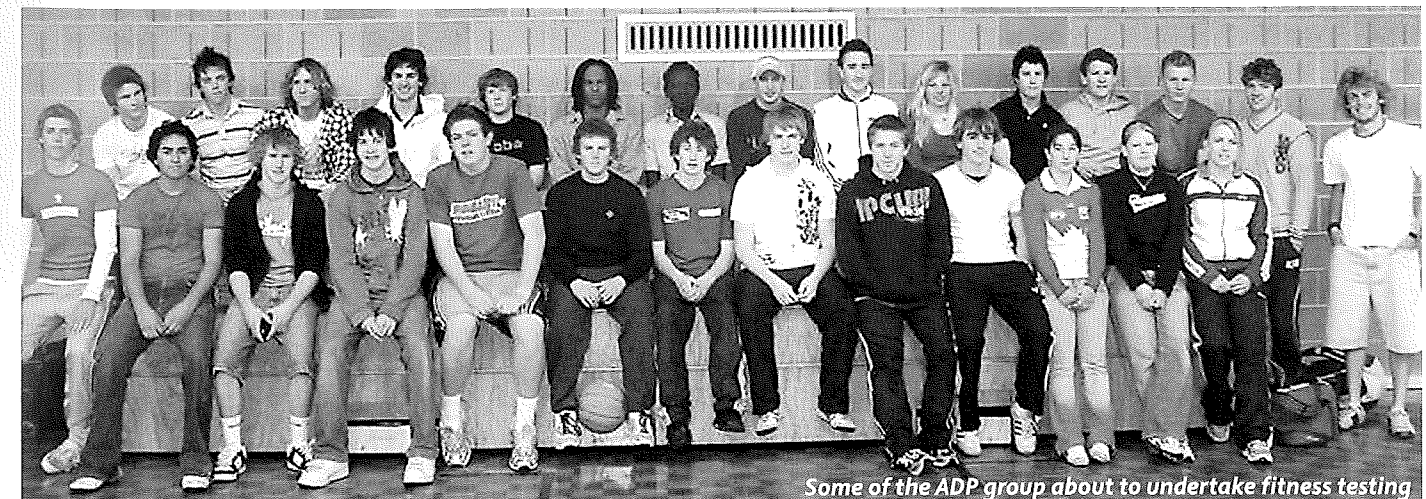

By **Mel and Dyl**

In term 2, our VET class completed a Sports Medicine Awareness Course which was hosted by Joe Ratcliffe. This course covered a variety of areas ranging from prevention strategies including strapping through to managing field injuries. We found this course beneficial, informative and enjoyable.

By **Will and Emily**

During VET Sport and Recreation this year we have completed a number of courses such as a TASRAD course which will help people like us who want to take sport and recreation sessions and include those with a disability and make them feel equal. We also completed the SMAC (Sports Medicine Awareness Course) which involved learning about sports injuries and how to treat them. We also completed our Senior First Aid, Workplace 2 where the things we learnt included DRABC, CPR, bandaging and dealing with shock. We also studied Occupational Health and Safety which involved learning how to identify changes in the workplace. The generic Coaching Level 1 course.

By **Erin and Rob H**

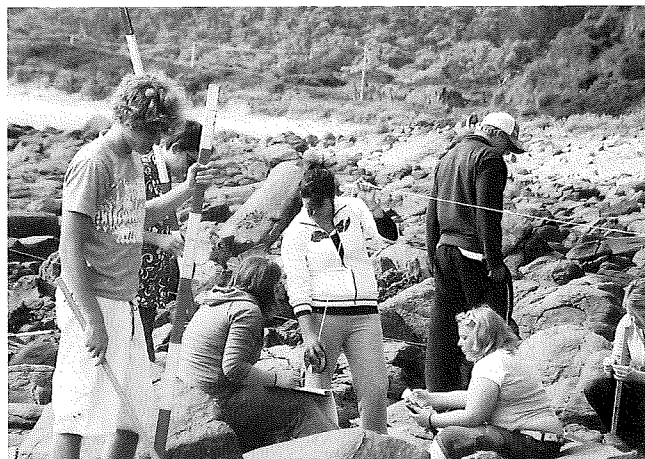

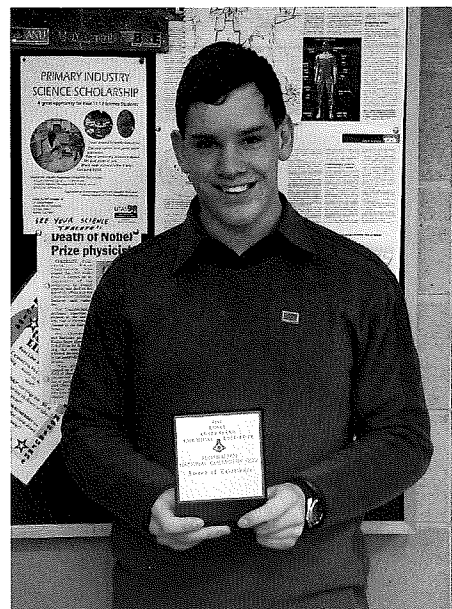

Some of the ADP group about to undertake fitness testing

Chemistry Quiz Success »

Congratulations to Andrew Dicker who received an Award of Excellence for his efforts in the Australian National Chemistry Quiz, organised by the Royal Australian Chemical Institute.

Andrew's result was in the top 1% of results from all participants throughout Australia.

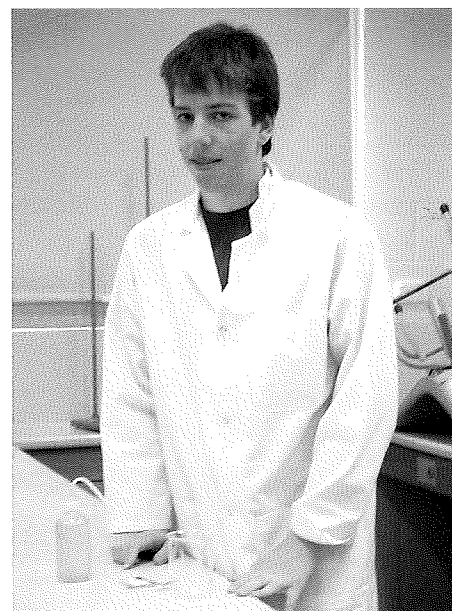

« Introduction to Life Science

This class participated in several excursions that reinforced their classroom learning. Other trips in addition to Badger Head were Hollybank, Tamar Island and the Gorge area.

National Youth Science Forum »

Robert Hudson, a year 11 student has been chosen to participate in the National Youth Science Forum to be held in Canberra in January 2007. Congratulations to Robert on achieving this honour. Well done.

« Electro-Technology

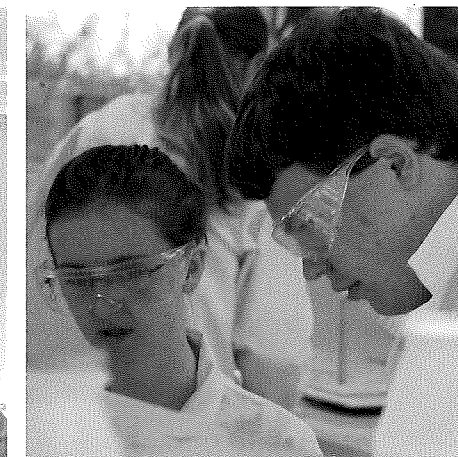

Certificate 1 in Electro-technology is a pathway into the Electro-technology industry. TAFE and Launceston College collaborate to provide a range of learning experiences for students including hands on practicals, industry vocational experience, excursions and science projects. At Launceston College, there is a scientific focus, while at TAFE there is an industry training focus.

Titration Competition

After a lapse of several years, Launceston College again had teams competing in the Titration Competition run by the Royal Australian Chemical Institute. The Competition gives students a chance to demonstrate both their practical laboratory skills and their scientific understanding; each student must have knowledge of the reactions taking place and the relevant chemical equations, be dexterous and able to manipulate the glassware and finally be able to complete some standard calculations (a calculator is handy for this!).

In the end there were two teams representing Launceston College. They spent the morning of Saturday 12 August busy in a Chemistry Laboratory at the University of Tasmania, Newnham, along with teams from other local schools. The Competition also took place in Hobart and on the North West Coast, meaning the LC teams were competing not so much against the other teams present on the day, but against all other Senior Secondary teams around the State.

Our participants are to be commended for their motivation and initiative, fitting in practice sessions around exams and other commitments and giving up their Saturday morning to compete. Special mention should go to Dara Mullins and Abby Gray who both received Certificates of Achievement. Their results were within 1% of the true value. Great effort guys!

Guest Speakers

Students were able to hear visiting lecturers during 2006 giving them an idea of real science being completed in the community.

In August as part of Science Week, Dr Troy Gaston from the Maritime College addressed Environmental and Biology students on The Impact of Rice Grass on the Tamar Estuary.

On Wednesday 27-September Launceston College was fortunate to host the Australian Institute of Physics "Women in Physics Lecture". This lecture was delivered by Professor Deb Kane of Macquarie University, NSW. Professor Kane spoke to students from Launceston College, Prospect High School and Newstead College on her research work about using lasers to clean extremely small particles (nano-particles) from the surface of materials. It was fascinating for students to learn that Australia is leading the world in this area of research and that the technology was particularly useful in the production of micro-chips and in the cleaning of surfaces of art work that has deteriorated over the centuries.

Public Relations

This year two Public Relations Classes ran at LC over lines 1 & 2. PR is a vibrant subject that engages enthusiasm from all involved. It is a practical and theoretical subject (but the less of that the better!!) that is centred around communication between two parties.

This has allowed both classes to become involved in many activities and events, some from teacher direction and others from student initiative. Some of these have included:

- Easter Raffle
- Global Gourmet Day (First Prize for best decorated stall)
- Interviewed various people within the community
- Hair Auction
- Front of House for Hair (Ushers)
- Numerous Parent Teacher evenings
- Surveys around school
- Assisted with High School Orientation Days
- Acted as volunteers for numerous associations: Oxfam, St Giles, Fusion, Fair Trade Coffee, Launceston City Council, Launceston College
- Rock Challenge (promotions and selling of food and beverages)
- College Open Day
- Devised and organised the inaugural "What's your future like?" info expo
- Hosted Bicheno Primary School students
- And had AN AWESOME YEAR!!!! under the guidance of Denise Truscott & Steve Tully.

Relay for Life

Over the coldest day and night in April, a dedicated team of LC people, including Student Council members and staff raised heaps of \$\$\$\$ for cancer Research. This was a fabulous community event, and a great experience for the participants.

Aboriginal Club

J Block – the home of aboriginal students and their many friends

The huge family!!!!

Wow what another fantastic year of work in J block we have had once again. What can we say about J block that hasn't yet been said.

We are seeing more and more people coming to J block. If it's not to work it's to see how things are going, just to have a yarn, learn about what we do or just have a coffee. We still say and always will say this place would not be here if it wasn't for the way Marie Stannus makes everyone feel so welcome to the place and they just keep coming back. We have lost a fair few of our old good working students from the past years but there are a whole lot more showing that they have the potential and ability to come and work and get things done. In J block we learn so much because we help each other in numerous ways that we can.

People who come here are always willing to help out when they can and the good thing about J block is that when people come in here they are accepted for who they are and not what they are. Sometimes J block has its ups and downs but we all seem to get in and sort them.

I have been attending J block for a number of years myself and I have learnt a lot and come a long way with the help that everyone that comes in here is very kindly willing to give.

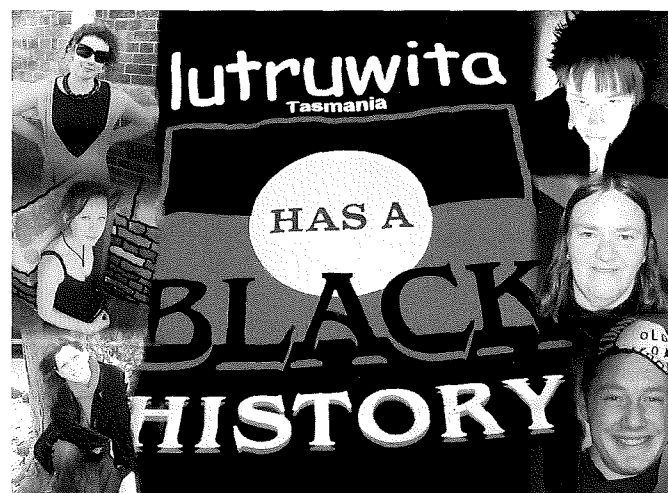

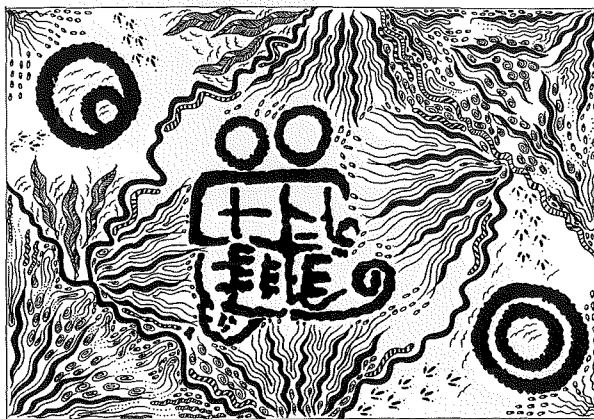

We have this year got a highly skilled Aboriginal teacher to come in and help us do an enterprise class that is also going very well. Without the help from Roseanne Viney we wouldn't know how or where to even start but knowing that Roseanne and Marie are here with us, we are getting through very smoothly. Most students that come here get along like a house on fire, even the non Aboriginal students and most times it just feels like we are one big family. Our elders really praise us for the time and effort we put in to some of our work at J block and try and take the time to come and see how things are going. J block mob would like to thank you for taking the time to read this article. Thanks so much from the J BLOCK MOB OF 2006

– Douglas Greaves

J BLOCK

J block interesting,
With many different people,
With different personalities,
As individuals, or many groups,
We find friends,
No one argues much,
Not much fight,
Little people but large personalities,
No destruction,
Able to do school work,
With little distraction,
Friendly faces,
With good hearted people,
No need to be loner,
Community welcomed to visit,
Next to no help with concentration is required,
As caring people follow.

By Ben Medcraft

Josh, assured, was always first through the door

Ben immersed himself in poetry, religion and philosophy
Literate in these things, Zac tutored happily

One of our great supporters was Elvie, who taught us all
Claire danced out her heart and her soul
Kayleigh's quiet, thoughtful nature was valued a lot

Tas couldn't leave the place; he livened it more often than not
We were sad when Jaime left to go back home
Our Doug; doggedly on task, never did roam

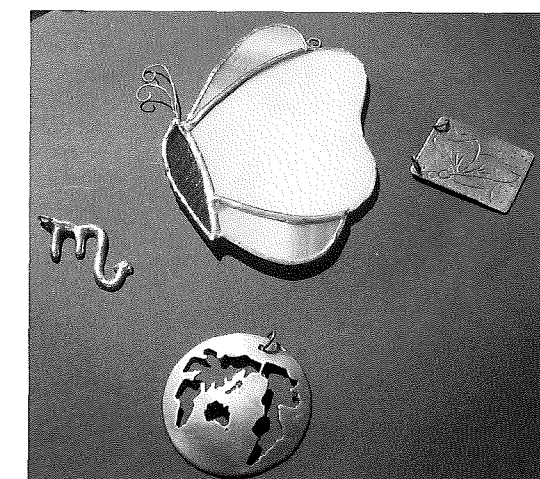

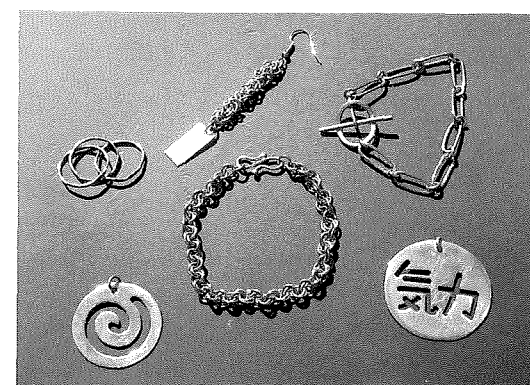

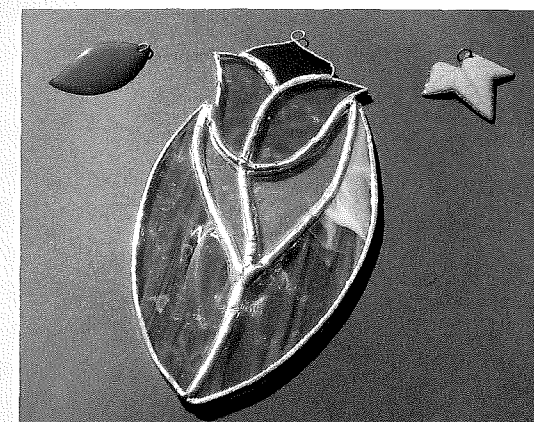

Talented painter Ricky showed us ochre's beauty
Hard working, helpful, and happy; Marie went beyond her duty
Occasionally, Steve called in to have a friendly chat
Using carpentry skills; a puppet theatre was built by Brad
Shari was never far behind
Adam turned up from time to time
Nick made us laugh, and was often at leisure
Danni always knew what to do under pressure

Aka Muzza, Sean was our resident director of artistic diversity
Never quitting, Roseanne showed us how to battle through adversity
Donna's fashion tips were in demand

Simon on Clarke, our camera manned
If something needed doing Bianca did the job
Xo xo FROM THE J-BLOCK MOB, 2006

Jewellery

This is some of what we did in Jewellery this year.

Yet again, it has been a fun-filled year in the Dance department. Students enrolled in the Level 3, 4 and 5 classes have been pushed to the limit and have enjoyed the results.

Streets Alive was one of the first performances that all of the dance students were involved in. The Harajuku theme asked dancers to create pieces based around a chosen subculture and through workshops with Adam Wheeler, dances were given character and flair, all based around the individual class themes. Schools all around the region were involved in the enormous street party. Colorful and exciting costumes filled the Launceston City Mall in a display of diversity and cultural acceptance. From stamp collectors, to punk rockers and even Australian farmers, Launceston College brought a collection of very diverse performances, all intertwined by one theme.

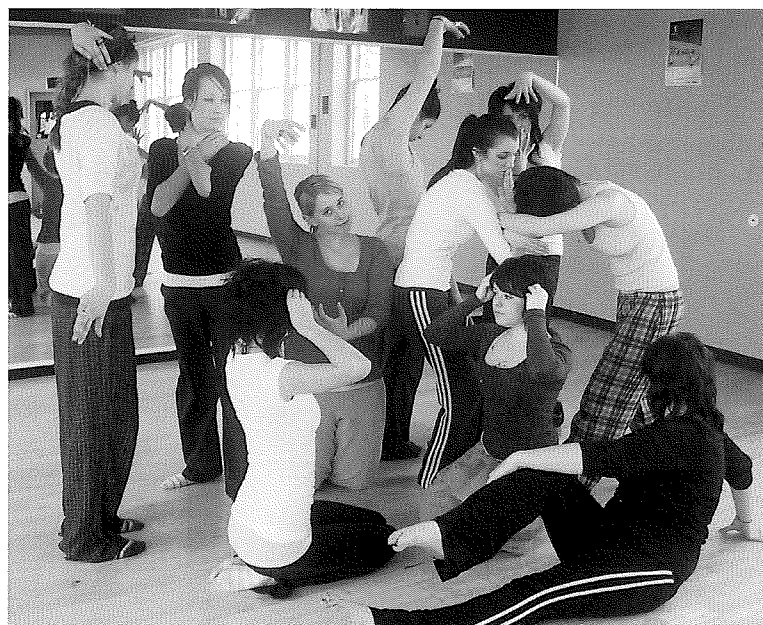

The Launceston Competitions gave two LC Level 3/4 Dance classes the fantastic opportunity to showcase their own visually enthralling contemporary dance pieces. These vibrant arrangements of creative movement and emblematic costume gave each dancer a chance to shine. One ensemble performed a piece titled **Hate to Love to Love to Hate**. The second piece was titled **Fun and Games**. Both groups made the College proud with **Hate to Love to Love to Hate** gaining a second place award and **Fun and Games** achieving a highly commended award. The Level 5 class received two highly commended awards for their pieces titled **The Holocaust** and **Rain**. All students performed brilliantly and they should be very proud of their results.

This year two of our Level 5 students, Lily Noonan and Alison Bignell were selected to take part in the TasDance Annual Touring Schools project which was a huge success. Both girls had to audition and then spend 10 days with other students from around the State creating a 20 minute dance piece. This year's piece was titled **Dry as a Bone**, and looked at the issues surrounding desertification. Both girls were stand-out performers and did themselves and LC proud.

The Term 1 Performing Arts Night was held on 30th May at the Earl Arts Centre. This was a fantastic evening, which showcased the exceptionally talented students we have here at Launceston College. This event allowed the students to display their choreographic works, gaining extremely valuable performance experience, whilst providing the community with an understanding of what the LC dance program has to offer.

Term 2 saw the Level 5 students preparing for their mid-year exams. The students had to prepare a group piece as well as complete a written exam. The level of skill was just fantastic and it really showed how hard the students have worked throughout the year. A big thank you must go to Liz Bennett and Rachelle Bliss for helping to assess the students' practical exams. Although a daunting experience for the students, it is invaluable to have other teachers assess their work and provide written feedback.

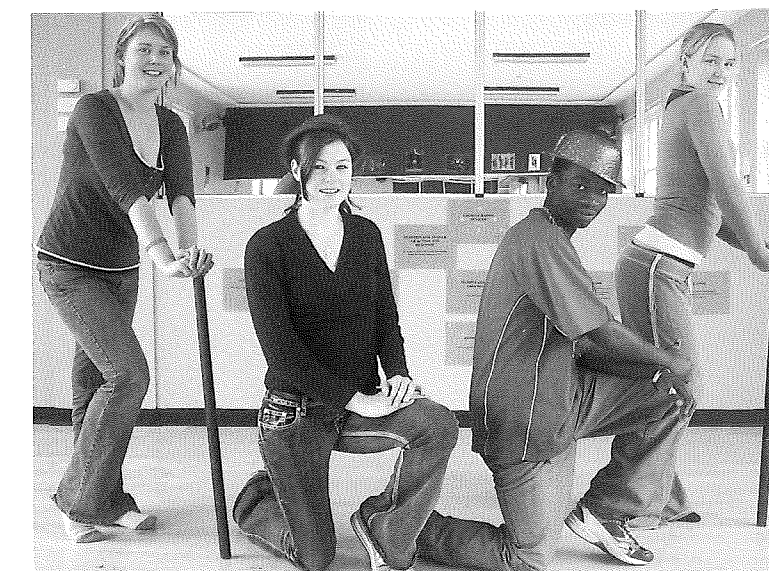

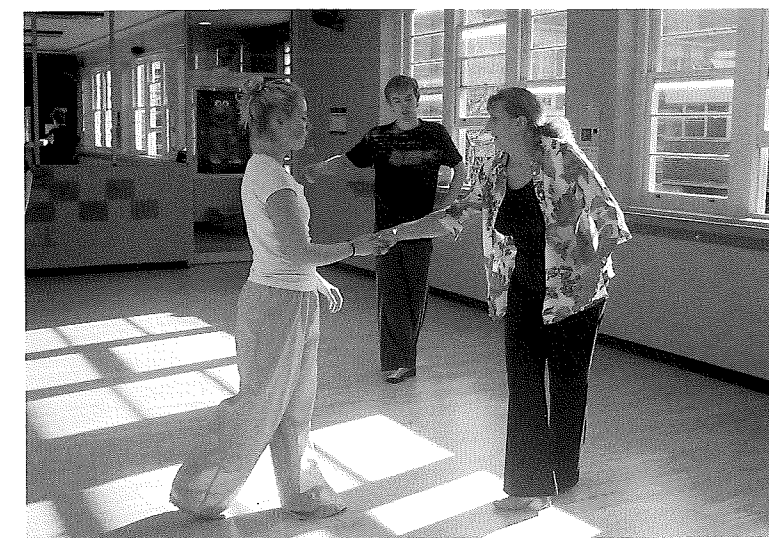

Term 2 in Level 3/4 dance allowed the students to experiment with different dance genres. In small groups they studied a chosen style and created dance pieces based around that genre; including own choreography. The Level 3s divided into three groups and from this they created a Cabaret, Break-dance/Street Jam Funk and Contemporary piece. Jazz and Street Jam Funk were the chosen styles of the Level 4s. A dance workshop with Luke George from Stompin' provided the contemporary classes with a morning of fresh movement material, based around their familiar theme. After this, the 3/4 class was given the chance to experience a Latin flair in their class as Di Marsh from Heals and Souls Danceworld led the class in a Cheeky Cha-cha, a Sassy Samba and a Jumpin' Jive! The style was a different taste for a contemporary class, and gave the groups a feel of another way of moving and an energetic way to wind-up Term 2.

Term 3 saw all of the LC dance students preparing for the 'Final Fling'. This was held at the Earl Arts Centre on 30th October and was a chance for the Level 5 students to showcase their solo and group pieces that would be assessed for their final examinations. It was also an opportunity for the Level 4s to show their two different yet exciting and intriguing works **Beat It** and **Cabaret** as well as the last opportunity for the Level 3 students to perform in front of an audience for 2006.

This year all Dance students also had the opportunity to see performances by Sydney Dance Company and Tasdance as well as participate in workshops with local artists from Tasdance, Stompin' and Heals and Soul Danceworld.

Yet again it has been an absolute pleasure to work with such a committed and talented bunch of students. We would like to thank all of them for making this year so successful and enjoyable.

Who is he? by David C

Who is he?
This man who captivates us
He's bald,
Old
And wears a shirt of disgust

Who is he?
His name is Goodfellow
His brother is staring at us from the grave
His face is weather beaten
I fear to talk to him

Who is he?
He demands our attention
Makes us laugh
Talks about bashing
And kidnapping his drug abusing son

His motto is punch on... punch off
His anger is absolute
HE YELLS his words with passion

A childhood of terror
Has made this man
He stands before us today...
As a poet

The Things You See with the Naked Eye. by Micheal Shea

Being naked

Humanity's greatest fear is to be naked,
You can't hide when you're naked,
Nudity doesn't lie.

You can't hide the scars when you're naked,
Every freckle, mole, wrinkle,
Gives you away,
And tells the story you won't.

Every mark, every crease tells,
Of memories past,
Experiences come and gone,
However burned to the flesh,
A constant reminder of who you are.

Clothes tell different stories,
Clothes hide the truth,
They tell the tale,
Of what you want to be.

Clothes are not what we are,

Humanity's greatest fear is to be naked,
You can't hide when you're naked.

by Themis Wood

Haiku! Haiku who?
Haiku you and you, yeah you!
Haiku aloha dude!

Geoff Goodfellow Vs. The World by Sam Peek

He paces the room with muscles clenched
Ready to pounce,
ready to strike.

Holding a grudge against the world.

Looking for an excuse to explode,
a time bomb waiting to go off.

Tick

Tock

Tick

Tock

Crude and rude,
oblivious to the shocked looks (or just doesn't care)
I'm a real Aussie battler,
he told us, ready to sell his story to the world.
This story to which the ones who matter won't listen
Poems which speak of a blackened past,
A father drunk, a sister broken
I want to block my ears,
run away,
But I stay,
transfixed.
For curiosity is indeed a dangerous trap.

English

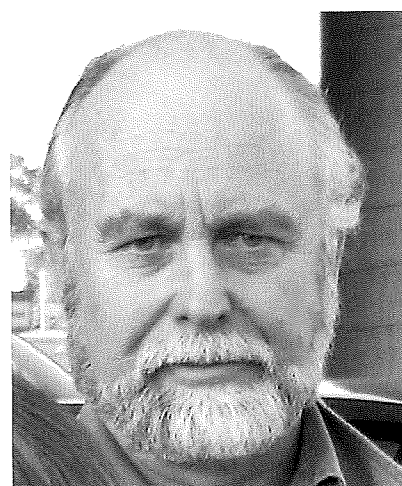

As part of our programme for the year, we invited in Geoff Goodfellow, a stimulating and sometimes confronting performance poet, who does not fit the stereotype many may have of poets; he performed for students from the English General and English Studies courses. Invariably, Geoff stimulates some interesting and exciting responses.

We also invited in Alan Taylor, a writer and former teacher. Alan worked exclusively with many of our English Communications groups and his brief was to "make 'em creative"! There are thirteen classes in English Communications this year, making it one of the most popular choices in the curriculum; however, students enrolled in the course range from welcome "refugees" from Maths and Science who need the points to get into university, to those who have a genuine love of English and find the course challenging and interesting. Naturally, there is also a range of abilities, backgrounds and interests.

During the course, students are expected, amongst other things, to demonstrate their skills in analytical, personal response and creative writing. As a fresh face and coming highly recommended, Alan was asked to focus on drawing out the creative instinct he believes we all have, but which lies deep below the surface in some cases! He took up the challenge over the course of four weeks at the end of Term 1 and the beginning of Term 2.

What better way to gauge the success of the exercise, than to hear what the students had to say in response to Alan's "full-on" approach!

- "Exuberant, eccentric, entertaining and educational."
- "He gave me an interesting insight into the origins of creativity."
- "Crazy but funny man, great to work with."
- "Made us look at writing in a totally new way."
- "He was full of life."
- "Crazy, but totally awesome to work with."
- "He was really good at making us realise we all have the potential to be creative."
- "Alan is a legend, funny as hell."
- "He looked a bit like Santa Claus, but made us look at things a different way."
- "He knew that you knew an answer, even if it took you a while to find it."
- "He found different ways to get our creative side out."
- "He was a true slicka!"
- "I didn't find him boring, he was truly inspiring."
- "He made me chuckle."
- "Alan made me look at the world differently and look outside the box"
- "He lied - he said everyone is creative!"
- "An inspiration to create."
- "He was different - passionate about ideas - even our ideas!"
- "Interesting, amusing. I learnt a lot."

Alan Taylor

Sunlit Glory by Tyler Mackey

Gradually life defrosts on this thawing island.
Morning windows bereft of
perdurable glacial coverings
permit a worldly perspective.
Wafts of sombre grey have fled amidst
golden heat and fierce blue promise.
Lustrous green oscillates where sky-high
limbs hide battered and dejected and
nature's being s, clasping warmth for life,
venture to bask akin to the cold blooded.

Incessant treetop chatter rouses those
who sleep a winter sleep and
the buzz of efficient gatherers, a
reminder of seconds squandered.
Those unsheltered, persist bowing to
the wind's animosity and elevate in
gratitude of hospitable breezes.
Bladed earth, malleable in absence
of frosty peaks, cushions the spirited step
and a prolific light liberates the eyes
to a panorama of sunlit glory.

Life the universe and everything: The complete master works; Chapter 1; Love, the birth of nations, and equity of society in the Australia Asia Pacific region. by Michael Shea

A country is a separate nation,
That is politically independent,
Land that is formerly independent,
Remains separate in some respects,
That's right, kids

I feel equity is totally irrelevant,
Gender, religious, and racial balance,
Simply for the sake of having them,
Is a cheap way to appeal to a wider demographic,

I nodded slowly,
I knew exactly what his drift was,
Though I tried to conceal it
It's not very often I find myself in the company of beautiful women
I find myself surrounded by the odds of our own ends

There's too much distrust on both sides,
Hindering any positive outcomes,
Simply believing that one man,
Can be solely to blame for the outbreak of war,
Is a narrow view to take.

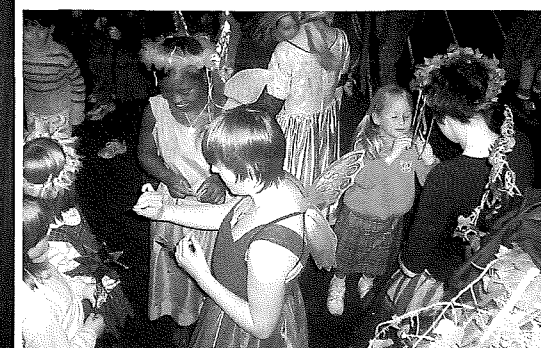

Drama

The cast of *Sleeping Beauty*

David Marshall as the memorable Hobgoblin

The fairies from *Sleeping Beauty*

It has been another busy year here in Drama. At the beginning of the year Nicole Lewis joined the teaching team and what a fantastic addition she has been. Drama Level 5 started off the year with a bang launching into their preparation of scenes from Australian plays. Their performances showed what talent there was in this predominately year 11 class, Stuart Kirkman's portrayal of Trev was particularly memorable.

The Launceston Competitions were soon upon us and Launceston College was very successful here with the two Theatre Performance classes coming first and second in the Verse Speaking section. Michael Fulton won the prestigious Chris Cabalar medal for his monologue from *Christian Brothers*. Other students who gained places with their monologues included David Marshall (as the now famous Hobgoblin), Grace Smibert, Michael Breen, Stephanie Dobson and Ashton Maher, who also won the trophy for the most promising performer in the entire senior section. We finished the term by sharing a number of these performances at the Autumn Arts Night at the Earl Arts Centre.

Term Two saw the Theatre Performance classes mount two Caryl Churchill plays *A Mouthful of Birds* and *Mad Forest*. These were performed at The Annexe Theatre at the University of Tasmania, the first time any school had the chance to perform in this professional space. The students handling of this challenging text and their maturity in performance was well suited to the space. Level 5 Drama then performed their mid year experimental theatre show *Decisions: The Choice is Yours*. This performance included excerpts from *Romeo and Juliet* (who will forget Jacinta's Nurse?) along with self-devised scenes. The night became a celebration of student work from other drama and dance classes, and it was all staged at the Earl Arts Centre. The term ended with the Level 3/4 class staging a children's theatre *Sleeping Beauty* which they performed to over 900 excited Kinder to Grade Two students. The show was a huge success and it helped the students from this class grow in confidence.

Term Three is a quick mad dash towards the exams. We must mention here the outstanding work of the 13 Theatre Production students who have supported all of these performances with their work in all areas of technical production. We certainly value their work and the sense of fun they have had in undertaking this work. We wish all students well in the future and will miss our Grade 12s, especially the kitchen dwellers!!

Police in Schools

This year we have had the pleasure of Constable Steve Bauld as our police officer as part of the 'Police in Schools' program. Steve has attended the College on a daily basis for 4 hours and has an office in D Block Level 2.

He has performed a range of duties designed to prevent unlawful behaviour and to promote a safe learning environment for our students and staff.

Some of the activities that Steve has been involved in include: Science excursions, Relay for Life walk a thon, Inter-College Day and organising a visit for students to the Rokeby Police Academy Open Day.

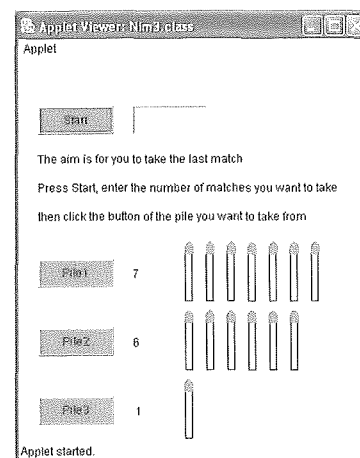

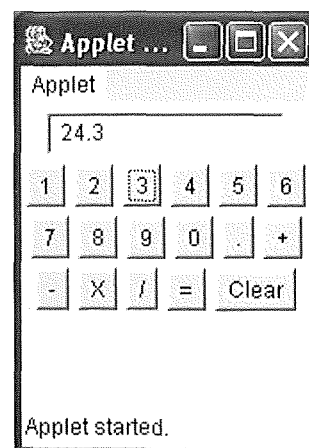

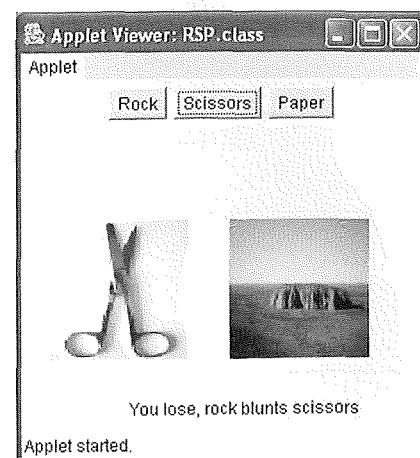

Computing

Ever seen a computer fly out of a D-Block window? Chances are you have. Computer Science in 2006 comprised of two classes of quick-thinking, smart, problem-solving students ready to take on the challenge of not succumbing to the urge of making their computer fly.

The course involved programming, basic computer structure and networking, with students involved in creating working programs and broadening their knowledge of computers in general. Computer Science students were often asked about the in-depth and challenging topics that they covered in class, to which they happily replied ... wait for it ... GAMES!

Over the year students have created their own calculators and paint programs, as well as versions of Battleships, Blackjack and *The Examiner's* daily Word Game. Overall, classes had a great time and the IT department are happy to inform that there weren't too many computers found along Brisbane Street this year.

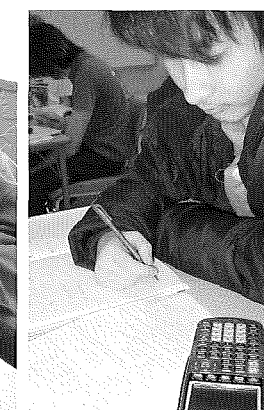

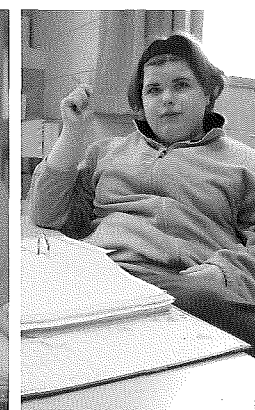

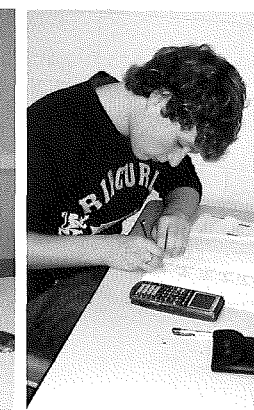

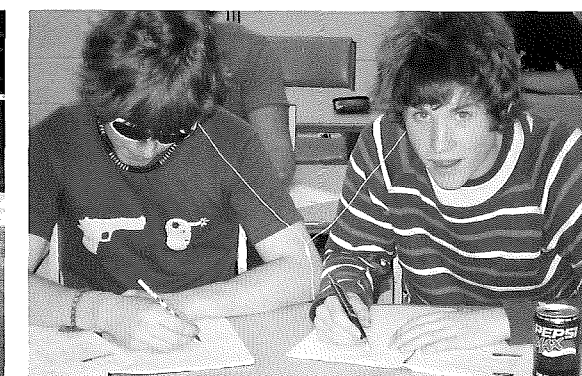

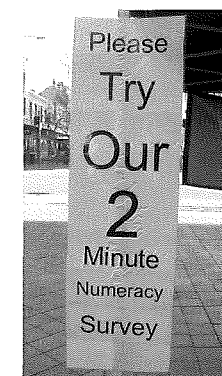

Maths

National Numeracy Week

It's a cool fresh morning, a white station wagon with Government plates pulls into the St John Street end of the Brisbane Street Mall. Young people converge on the car and as things are removed and set up, a small stall is quickly set up. One of the signs in large bold letters says, "Please Try Our 2 Minute Numeracy Survey".

It's National Literacy & Numeracy Week and the Launceston College Maths Department is involved! One of the Maths Applied 3/4 classes has helped formulate ten questions that can be easily answered by willing members of the public. The response was positive and students got to experience the waiting game you endure when on a stall. A good number of surveys were completed and students have assembled the findings.

Maths Relay

Third place in the regional competition: "Team B": Phillip Starkey, Uriel Walters, Autumn Lu and Xiaohan Ning.

Thailand & Vietnam Exchange

The concept for this exchange occurred during a conversation between College staff member Steve Tully and the director of the annual Thai Exchange Supannachaht Plang-ngoen (Chaht) during the 2005 High School Exchange Program. Chaht expressed interest in the proposal that the exchange be extended to include Launceston College in 2006. This proposal was ratified in a meeting between the Director of Sa-nguan Ying School, Supanburi and Keith Wenn, Principal of Launceston College. In January of this year Steve Tully and his family visited the school in Supanburi for eight days in order to develop the program with Chaht and to meet the families of the nominated students who were coming to Launceston College.

Four students made a commitment to the program: Brianna Cain; Nick McElwee, Lachlan Ingram and Natalie Szabo. These students and their families hosted students from Thailand from 18 March until the 14 April and Steve Tully hosted Chaht for the same duration. The Thai students – Kanchanok Suttirat, Uracha Theeranon, Naphat Umalee and Nubathong Jirapruethisiri were quickly whisked off to their host family homes to re-meet as a group on Monday morning. Our Thai students all decided to do the same subjects: x2 lines of English as a Second Language, Photography and Catering. For the next four weeks our students and their billets spent an incredible time together, building life-long friendships and exchanging everything from language to recipes. When it came time to see the students off at the airport we had to freight in extra supplies of tissues to deal with deluge of tears!

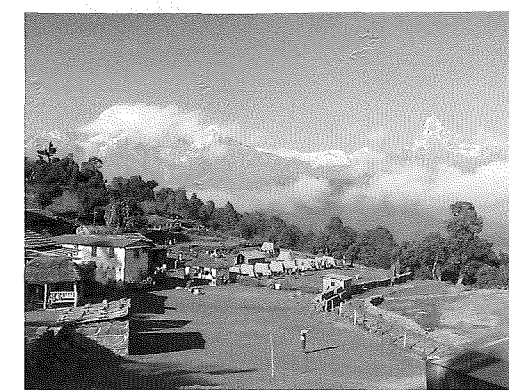

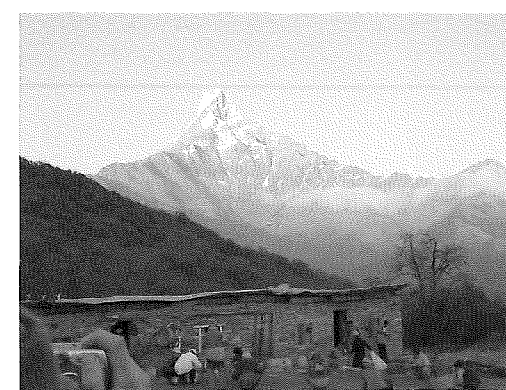

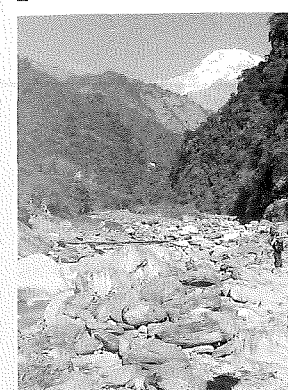

Just prior to departing for Thailand, Keith Wenn asked whether it would be possible to develop an exchange between our new sister school in Hanoi. It was determined that the best solution was to fly to Hanoi after the Thai exchange was completed and Deaine Coyle (Assistant Principal, International Student Program) became part of the team. Finally the group flew out of Launceston on 30 August staying for two nights in Singapore before landing in Thailand. The reception at Bangkok Airport was overwhelming! Our students and the Thai students were so excited to see each other again. We proceeded by bus to Supanburi and were welcomed at a huge reception at the school. For the next two weeks, along with students from Riverside High, Brooks High, Port Dalrymple, Queechy High and Kingston High we were taken on a very demanding helter-skelter tour of Thailand. Many of the students (and some staff) found the heat difficult to deal with and the food not always to their liking. The College students and staff revelled in the heat and there is photographic evidence that Steve Tully gained more than a couple of kilos! Deaine on the other hand lost weight and was very proud of her tan! The exchange is highly valued by the Thais and we even featured in an extensive documentary on Thai Channel 11 which was broadcast nationally!

On Friday the 15th of September we arrived at Bangkok airport and split from our friends from the other Tasmanian schools. Late that night we landed at Hanoi International Airport to be warmly greeted by the host families. The next morning we were welcomed by Hanoi Amsterdam School and conducted on a brief tour of the school – the students in Vietnam attend school on Saturdays – and then visited the original Hanoi University. On Sunday we travelled by minibus to HaLong Bay for a cruise, which was wonderful! On Monday we re-attended school, visited a local pottery village and then were entertained by students from HA School and LC in an impromptu concert where Natalie stole the show by demonstrating her dancing skills.

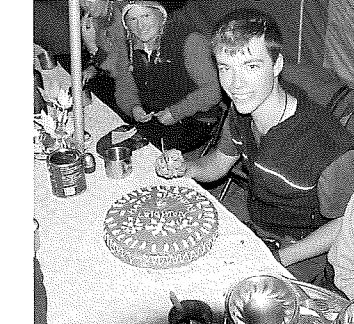

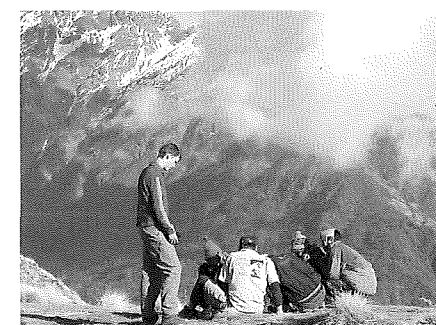

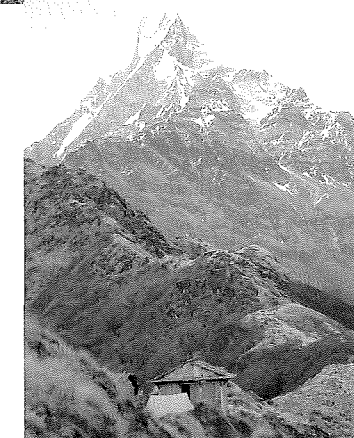

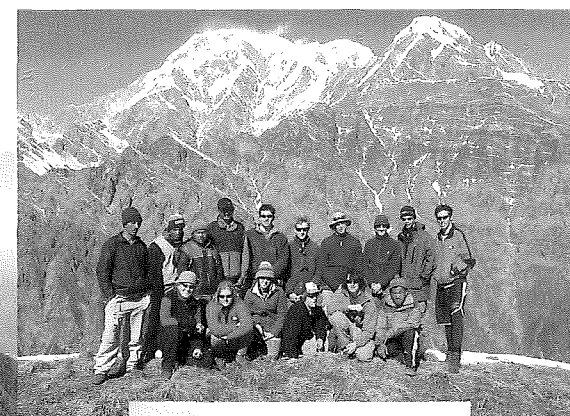

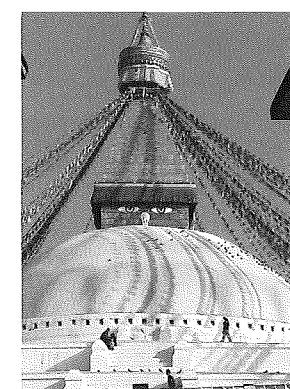

On Tuesday we left Hanoi International Airport after paying a massive excess baggage bill. We transited via Bangkok (oblivious to the fact that there had been a military coup the day before) and then flew onto Singapore Airport, then to Melbourne and finally Launceston and home.

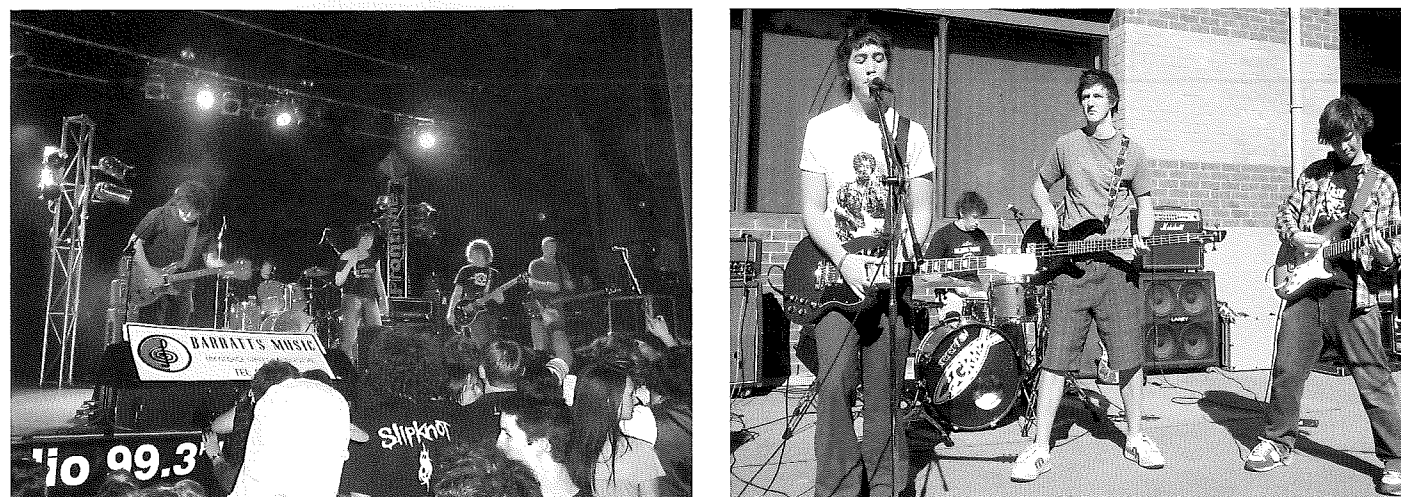

Nepal Trip

Adventure Education in Nepal 2005

This year contemporary music students have been flat out writing originals and learning the ins and outs of the contemporary music industry. Early in the year students stole the stage at the annual Launceston Competitions held at the Princess Theatre winning some major awards. Congratulations to all those who participated.

Some major events that have taken place during the year have been Streets Alive, the Tasmusic Rock Challenge and the Royal Launceston Show. Students have also performed at High Schools in the north and recorded in the LC studio in preparation for the release of this year's Tap CD.

Natalie Reid

Welcome this year to our new full-time Audio Design and Contemporary Music teacher, Adam Langridge. Adam brings with him a wealth of Audio knowledge, live performance skills and music industry skills and a desire to provide contemporary music and audio students with professional opportunities and to achieve high standards in performing and recording!

A big "thankyou" to our tutors this year for a fantastic effort. That has been evident through student performances at numerous community and College events. They are Glenn Moorhouse (guitar), Corey Gilham (bass guitar), Steve Sowerby (drums), Carl Bulow (saxophone), Jenny Munford (piano), Natalie Reid (vocals).

Vocal group have rehearsed incredibly hard this year resulting in wins at the annual Launceston Competition in May, performing the Anthem for Streets Alive and the invitation to perform for the State's Principals Conference during term two. Congratulations to the whole team and a big thank you to Jenny Bakun for accompanying the group and Valerie Timmouth for being the first teacher to join the team.

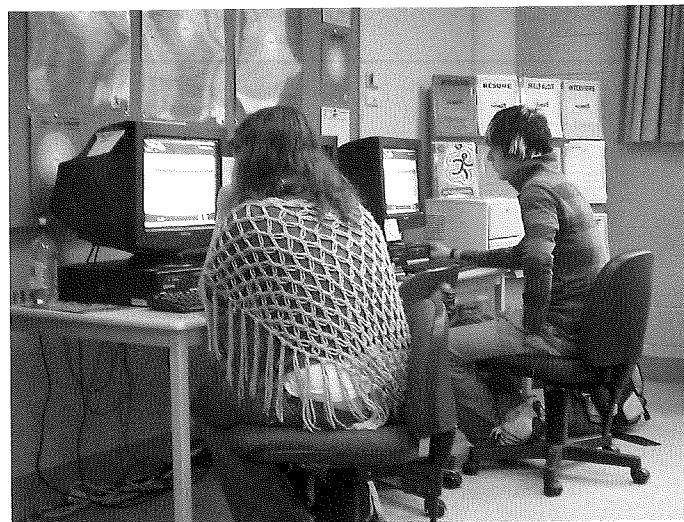

This year is my first year at Launceston College. After spending a number of years in the High Schools the change and the challenge of teaching audio at level 4 and 5 has been the highlight of my teaching thus far. The students this year have been working on a number of projects both within the college and in the wider community. These projects include running the PA at the Launceston Show for all northern high schools and colleges, recording advertisements for TV, setting up sound reinforcement for visiting professional bands from the mainland, Rock Challenge playoffs, the production, recording various high school bands, involvement in the performing arts week and various live performances and recordings for our school community.

This year we have expanded our recording facilities to have a digital studio downstairs in the music department. This will provide the Music Department and Launceston College with extra resources to cope with the demands of an expanding Audio Design course.

Adam Langridge

Careers Centre

This year has seen the LC Career Centre move to a far more central location in D Block. This has meant easier access for not only students but for staff and the wider community.

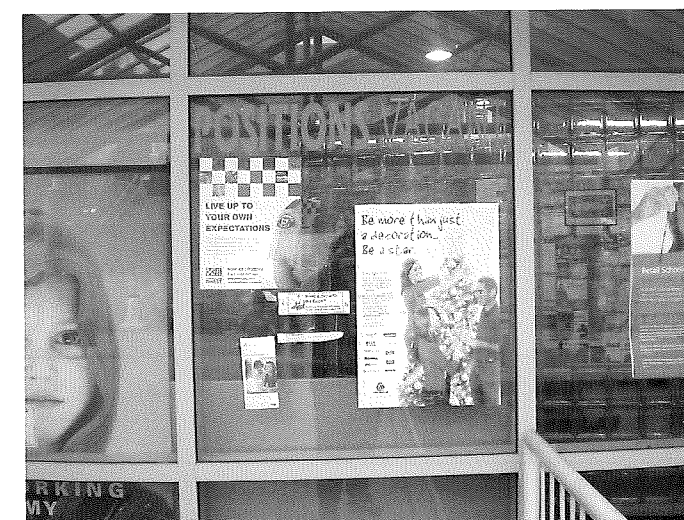

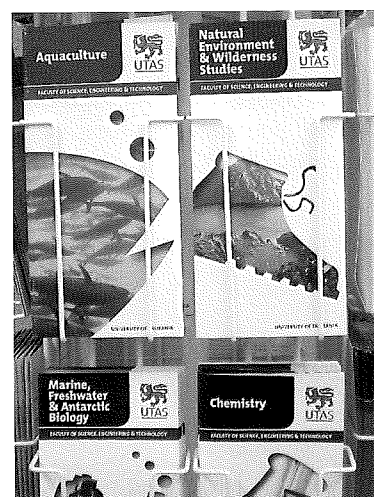

Throughout the year, services provided have ranged from career advice, university entrance and application information, where to find out about school based traineeships and course information for LC subject offerings.

We have maintained our Jiig-Cal (Computer assisted job interest and investigation) service and supported SA teachers with up-coming dates re school visits, university visits, information days and provided a 'Positions Vacant' window. As well as keeping relevant information on the daily news sheet, we have endeavored to communicate with parents and the wider community through the Newsletter.

Students not involved in a VET program have had the opportunity to participate in work experience in a variety of situations ranging from policing, nursing, ABC camera work to journalism and events organiser. We have had a busy but enjoyable year and look forward to 2007.

International Students

In 2006, we have welcomed students from South Korea, Thailand, Japan, France, Malaysia, China, the United States and Sweden.

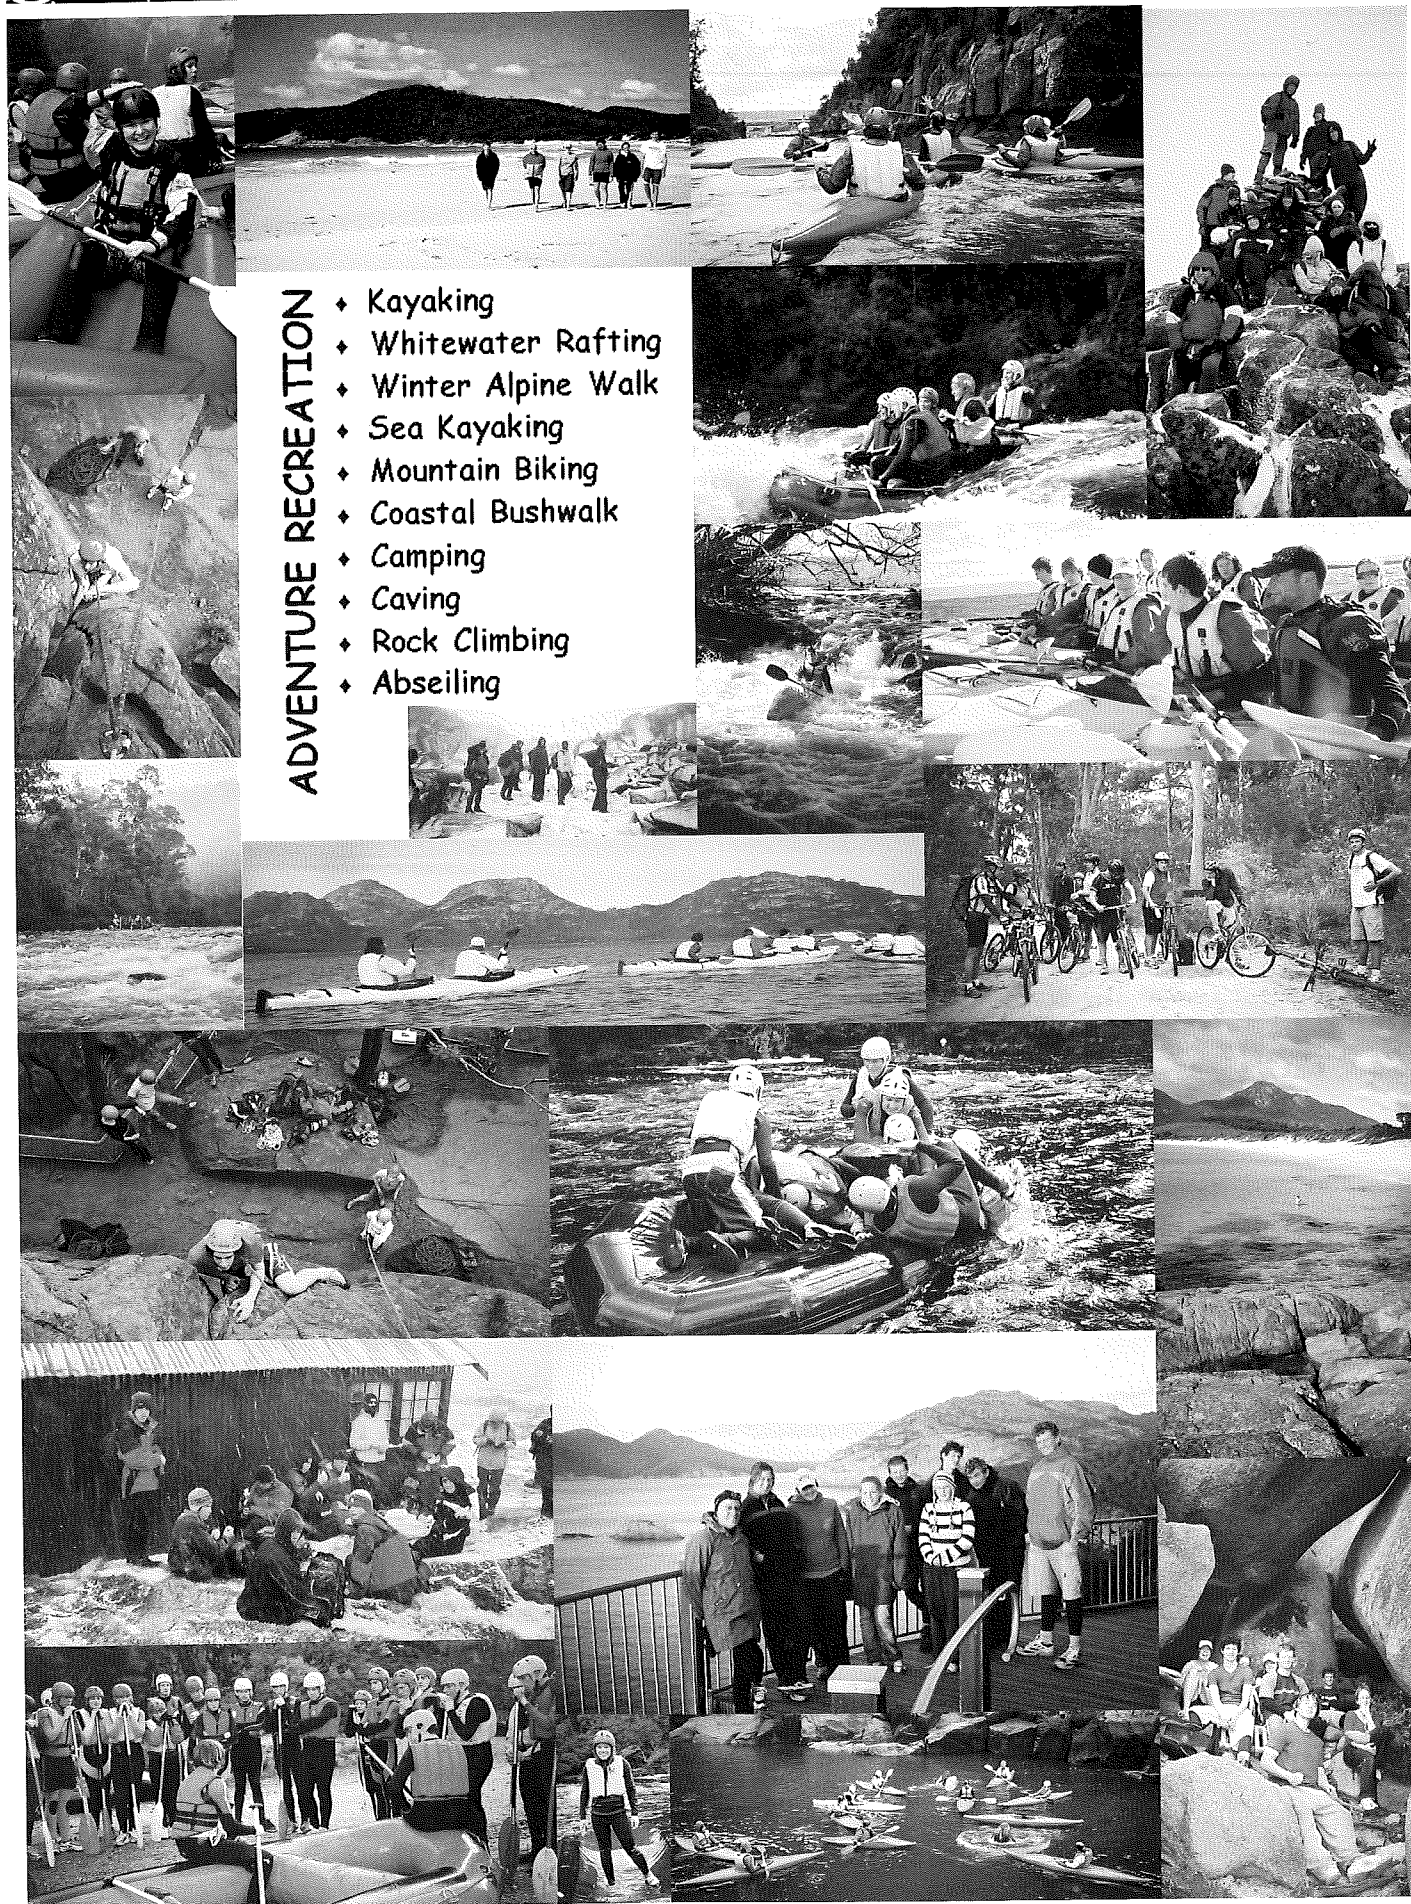

This year we have had a lot of fun. Activities have included welcome dinners, fishing trips, the school ball, lawn bowls, soccer and a knitting club. It's been a demanding year, but very enjoyable.

Inter-College Day

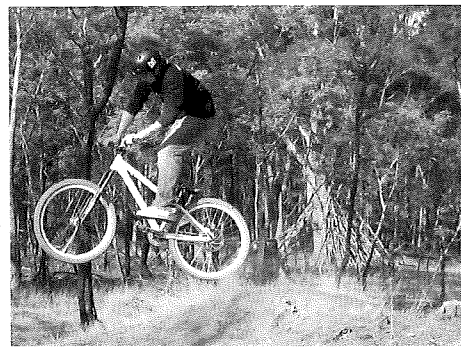

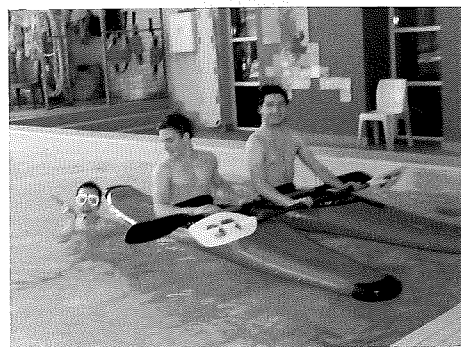

Another Inter-College Day was held on Thursday 29th June. The day was rain free and a large sigh of relief could be heard from all those involved!

316 enthusiastic Launceston College students joined with 1248 others from around the State; Rosny 46, Hobart 108, Hellyer 147, Elizabeth 171, Don 306 and Newstead 470, to participate in 26 different events, from ALF to Yoga, over the greater Launceston area.

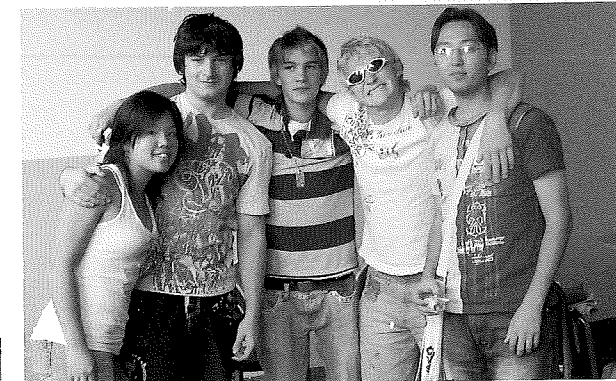

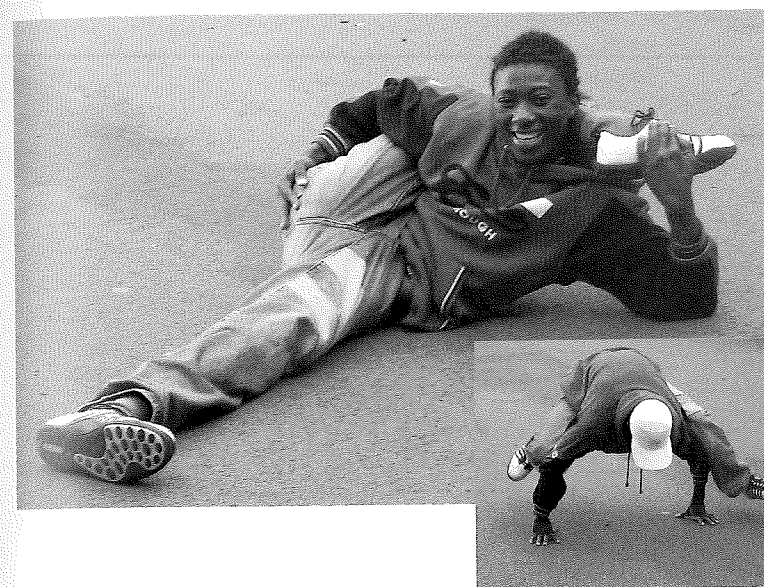

LC won 9 out of the 24 competition events that had a SCALP trophy up for grabs, Elizabeth won 5, Don 4, Hobart 2, Newstead 2, Hellyer and Rosny 1 each.

A great day was had by all!

ACTIVITY	SCALP WINNERS	2nd	3rd

Tennis (Women's singles)	Elizabeth	Rosny	Newstead

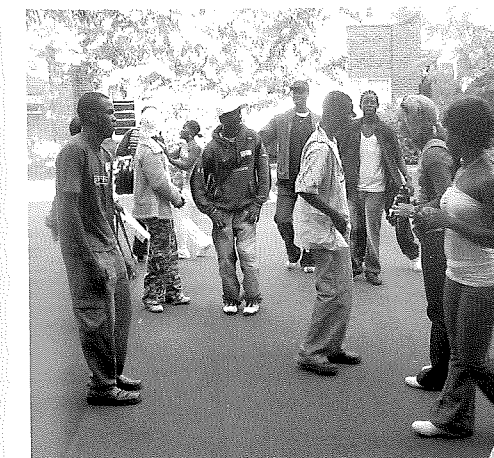

Migrant Celebration BBQ

A BBQ to celebrate being part of LC's learning community.
Students had to invite a guest who supports them in their learning.

A great time was had by all, and the dancing was fantastic!

Canoeing

This year's trip from Evandale to Perth was in lovely weather with the river at a good height – not too high but enough to make things non scratchy yet still enough to make people paddle. Launceston College provided 11 paddlers while Don provided 4 more – so what with these people and the teachers, we were well prepared!

LC students had to convince Jason they could escape from kayaks first so everyone had to demonstrate in the pool they could turn upside down and get out! This was fine in the nice warm pool but the idea in the cold river of doing the same was not so appealing!

We were paddling by noon after Don College members met us out at the river's edge. This is just west of Evandale in a picnic area off the connector road between Evandale and the Midlands Highway. The teachers did a car shuffle to ensure our dry clothing and transport was ready for us at the end.

After about 2 kilometres we met the dreaded Glendessary rapid that consists of the river sliding down rocks and over a ledge into a pool then turning sharp left! All this protected by trees. We all got out to look. Jason paddled first and then some other teachers. We had the option, walk it or try it. A few walked but many of us tried and some went back for more. Then, long flat water seemingly stretching out for ever.

We stopped about half way and ate snacks or lollies and eased our aching arms then plowed on down a long interminable straight towards a fir tree on a hill, then towards an island. Here, we were warned, lie rocks, follow the leader! Those who didn't got stuck ignominiously while the others edged down the slightly deeper channel near the island.

Then down to "THE WEIR" – the remains of the old Perth flour mill dam and natural rock ledge of 1 metre. After the safety people were in place we went down one by one and plopped over the ledge in the pool below. Most exciting especially for the one or two who became stuck on the edge!

Then some rocky rapids and to the finishing pool to load the kayaks and wait for the bus!
A great trip!

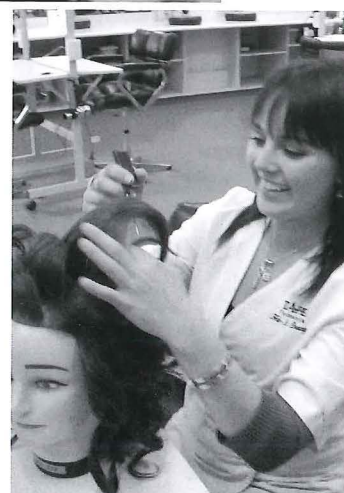

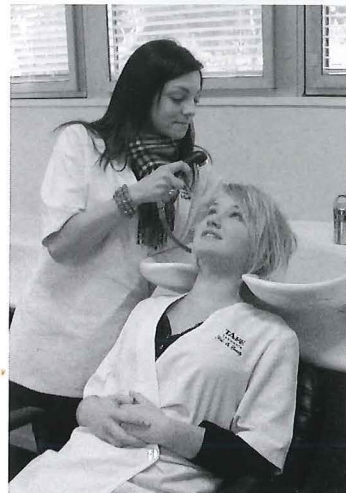

Vet Hairdressing

Eleven students successfully completed Certificate II in Hairdressing this year and congratulations to Reanne Shirlaw who obtained an apprenticeship with her employer at the end of the first Work Placement.

Students had a busy year, practicing their hair and make up skills for the production of *Hair*, completing their First Aid Certificate and a Certificate of Attainment in Design and Apply Makeup.

With the guidance of the teacher, Tenille Savage, students put the theory into practice on friends and family who acted as models and on two work placements in Salons in Launceston and George Town.

Global Gourmet Day

Kane Hallam

Computer Graphics and Design Students have spent the year honing their skills in the use of 3D computer modelling and animation programs.

The goal is to create 3D images and scenes that appear to be "real".

Aaron Barnett-Meagher

Laura Arnold

Lewis Philpot

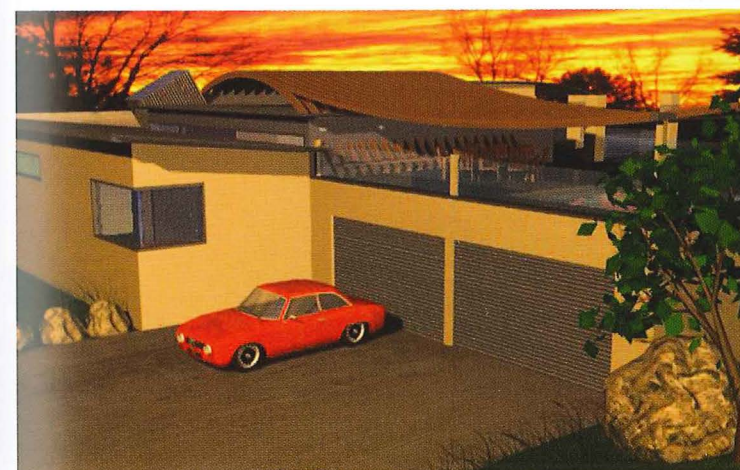

Adam Crick

Jae-Hyun Park

Chris Scollard

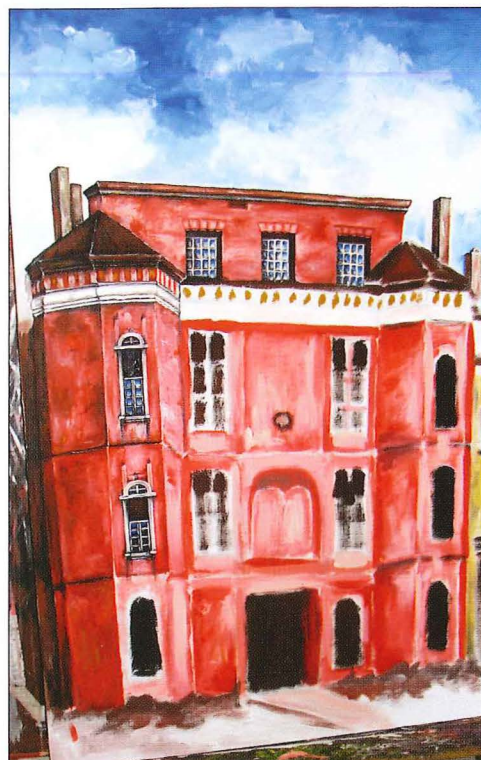

Duncan Jacob

The programs such as 3D Studio Max are very powerful and are capable of attaching an unlimited range of "materials" to the 3D computer models as well as adding light, shade, reflection and a range of atmospheric effects.

Kaitlin Langdon

Melissa Clark

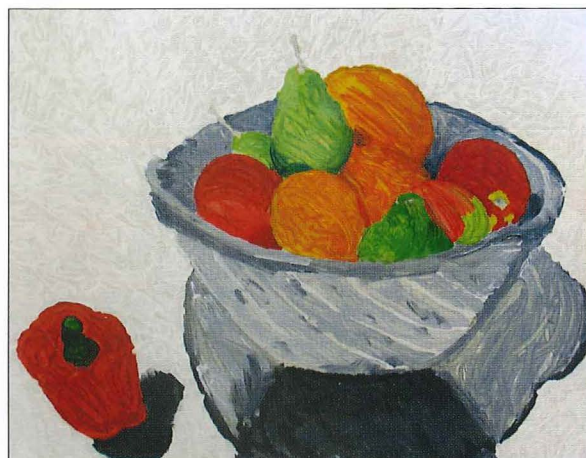

What a big year it has been in art, full of extremely talented students, excellent exhibitions and brilliant art work. Art 2,3,4 classes have been booming with some amazing work being produced; from shoe sculptures to still life, textiles to etchings, portraits to animations; these classes are the breeding ground for successful Art Production Stage 5 students.

Speaking of Art Production Stage 5 students, this year has got to be one of the largest groups we've ever had with about 35 students setting up for the end of year exhibition. Crossing fingers for a stack of EAs! Life Drawing night class has taken off with a diverse range of students and models taking part. Our mid year exhibition was a hoot and reflected the amazing talent.

Art Appreciation has been introduced as well as Art Production, offering more educational options to cater for the artistically inclined. Special thanks to our brilliant intern, Cameron Ivory for his excellent teaching and learning as well as positive and enthusiastic approach.

Don't forget to check out our on campus gallery, The Gallows, off campus gallery at The Earlington Hotel in town, as well as our On Line Gallery linked to the school site. Keep creating and well done all those art students!

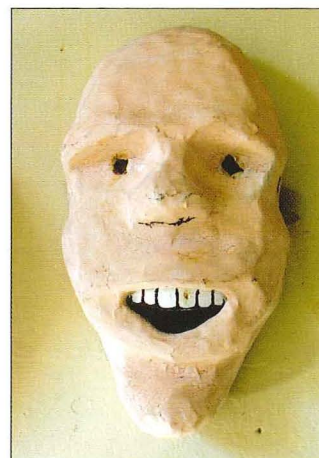

Cheers, Ben Miller

The Ball

Business Studies

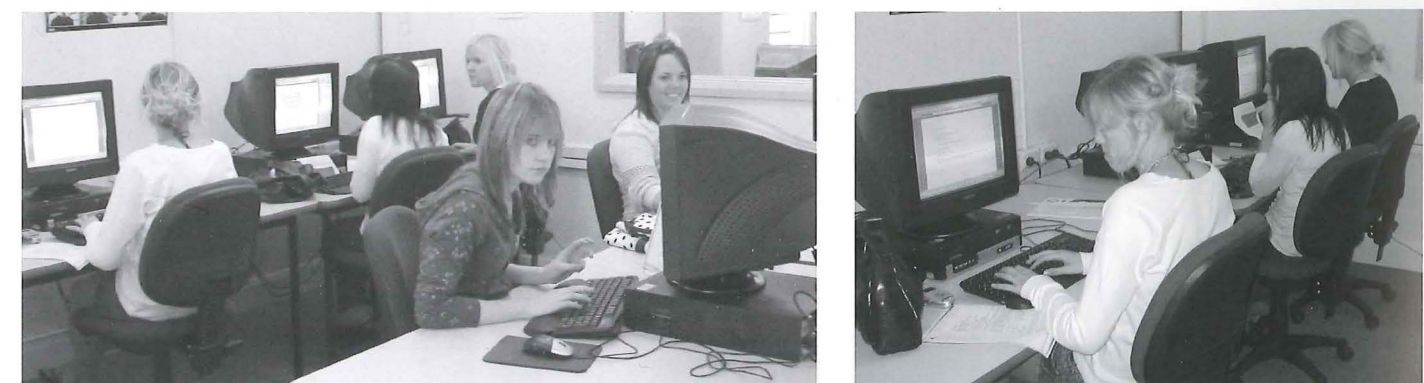

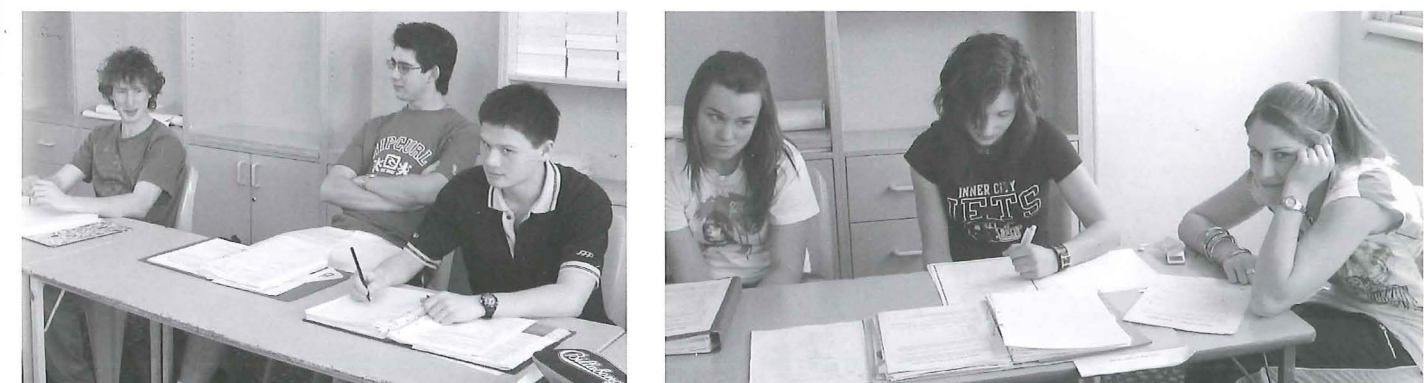

2006 has seen a dramatic increase in the numbers enrolled in Business Studies. Students have participated in Public Relations, Accounting, Legal Studies, Enterprise and Economics. Looking at the practical application of business concepts to the real world.

Legal Studies students ventured to Hobart to participate in Lawfest. An early start, leaving the College at 7.15am. The topic this year was sentencing, we heard from Justice Shann Tennant, as well as senior lecturers at the University on the impact of custodial sentencing on prisoners, their families and the general community.

All of our Accounting students undertook a unit of study on personal investment and competed in the National Student Share market Game. Some groups did very well, achieving a high ranking at the State level.

In addition to their study of the theory of economic, students undertook a number of independent inquiries. A diverse range of interesting topics and current issues were investigated including the proposed pulp mill, the Bass Link project, wage setting arrangements and globalisation.

LC Info Expo

Student Support Services and the Public Relations students brought a new event to Launceston College – the Info Expo – ‘What’s My Future Like?’ on Thursday 5th October.

The event was a great opportunity for Gardia, our Bachelor of Social Work student from the University of Tasmania to work with our students, and the students really came through with their fantastic PR skills and hard work. The place was awash with posters and a huge, very professional banner put together with the wonderful assistance of Robin Thorne.

About twenty service providers from the Launceston community came to the College Hall, providing a range of resources and opportunities for students to link up, or get stuff organised.

People could enrol to vote, get info about renting, Centrelink was there, the Police and Road Safety Task Force ran a competition, getting your own Tax File Number was an option, finding out stuff about relationships, sexual health, work and finances – there was a great range of practical and interesting people to access. Lollies, prizes, give-aways ... The Service Tas bags really came in handy!

Here’s a few photos of the groovy people who were there!

Vet Hospitality

Twenty five students have made up the VET Hospitality class this year with 14 Back of House and 11 Front of House students. They all completed 2 work placements in local hospitality establishments with a number picking up casual work as a result.

During second term the students ran Elcies Restaurant, every Thursday lunchtime, for up to 70 guests each week. A full à la carte menu was offered as well as theme-based menus planned and organised by the students. These practical experiences gave the students many opportunities to learn and practise the industry standard skills required to work in the Hospitality Sector.

All students successfully completed their Workplace Level 2 First Aid certificate and many also completed their Responsible Service of Alcohol certificate.

A number of occasions stand out as the highlights of the year:

- Combined College induction day for tourism and hospitality students from LC, Newstead and St. Patrick's Colleges at the Hotel Grand Chancellor.
- Participation in the Global Gourmet Day as part of the Work in a Socially Diverse Environment unit. Hospitality students teamed with International, Refugee and LOTE and Exchange students to find out more about the cultures, particularly food preferences, and then worked together to prepare the foods for LC staff and students to sample.
- Functions especially for the parents:
 - Welcome cocktail party where laden bar trays were nervously carried for the first time for many!
 - ‘At the Movies’ theme night end of term 1
 - ‘Italian’ night at end of second term
 - The Year of 2006 Finale – 50s American Diner theme evening
- Tamar Valley Winery Trip to increase knowledge of the local industry and part of the Table Service of Alcoholic beverages unit for Front of House students.

VET Hospitality Class of 2006

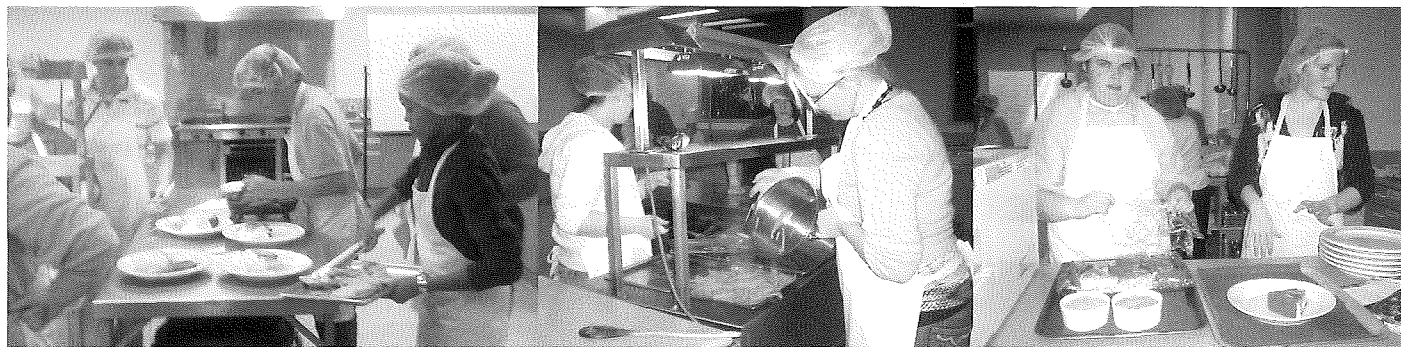

Catering & Food Studies 3/4

Food Studies (Practical)

Food Studies is a subject the College offers to students in order to help them develop their practical food preparation skills, knowledge of food safety requirements and to learn about basic nutrition and health. We also look at Food from Other Countries and this year we incorporated this unit of work in with the College's Global Gourmet Day. Another unit we studied was Food for Special Occasions, so at Easter time there was lots of chocolate about and the traditional Easter Buns!

We get to cook on a regular basis and have the opportunity to select our own recipes within the topic we are studying. This subject is a great way to 'have a break' from lots of Level 5 studies, but we also had students in the class who wanted to get some skills to 'get into' Catering or Vet Hospitality in the following year. Students from other countries also joined the class, so that made it even more interesting.

We would highly recommend this subject to other students as it is a great way to become independent in the kitchen.

Catering and Catering Management

In Catering this year we have had a great time opening Elcies Restaurant at recess times, catering for functions in the hall, for example the fundraising auction for the Production, organising food for 'outside' functions in the Flight Deck and providing tasty snacks for Bar Operations. All this culminated in our Parent Functions in second term.

These were the highlight of the year where we had the opportunity to plan, prepare and serve food to our invited 'guinea pigs'. It was a pretty scary experience, very stressful and certainly a lot of hard work. However, in the end it was also fun, an excellent test of our team working ability and a good way of seeing if we could apply the skills we had learnt in class.

At other times we have worked on 'challenges' and 'enterprise' activities. Both these areas gave us an opportunity to develop our skills and to produce yummy food for ourselves or for sale!

Café Culture & Bar Operations

A new short course offered this year has seen B Block Level 1 busy every Monday morning with customers (many regulars) coming down to Elcies Café for a caffeine fix!

Students have operated the Café each week offering a selection of café style snack foods and the usual range of hot and cold beverages.

The main emphasis has been on mastering the espresso machine so that work as baristas would be an employment option for students.

Opportunities were also provided for students to learn skills and knowledge in all aspects of operating a café, from food preparation and service at tables, operating a cash register, processing orders, customer service, and cold beverage preparation.

Gaylene Allen

Bar Operations

Great way to learn new skills for the workplace!

Great wines, great drinks, great food!

Is this a cocktail or a mocktail?

We take this seriously!

An enjoyable experience!

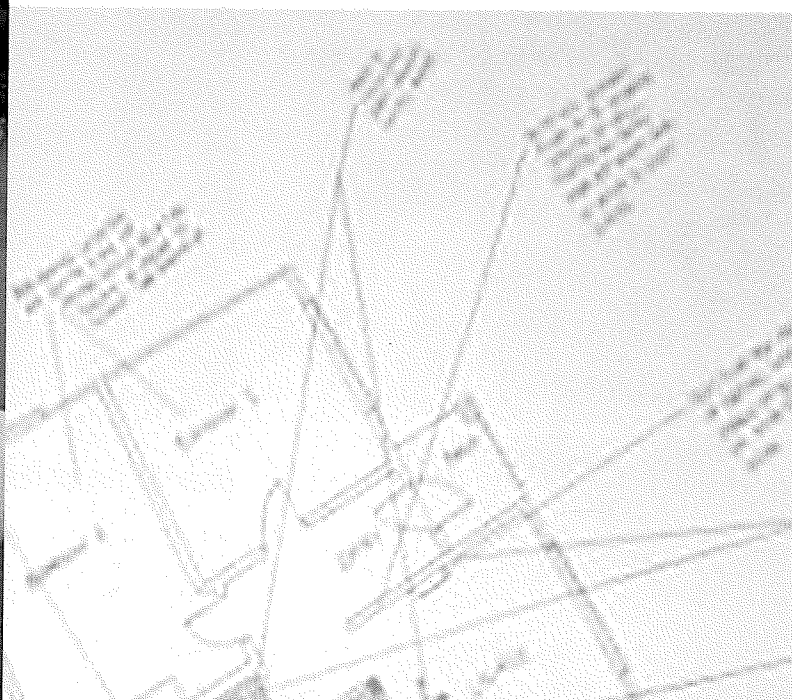

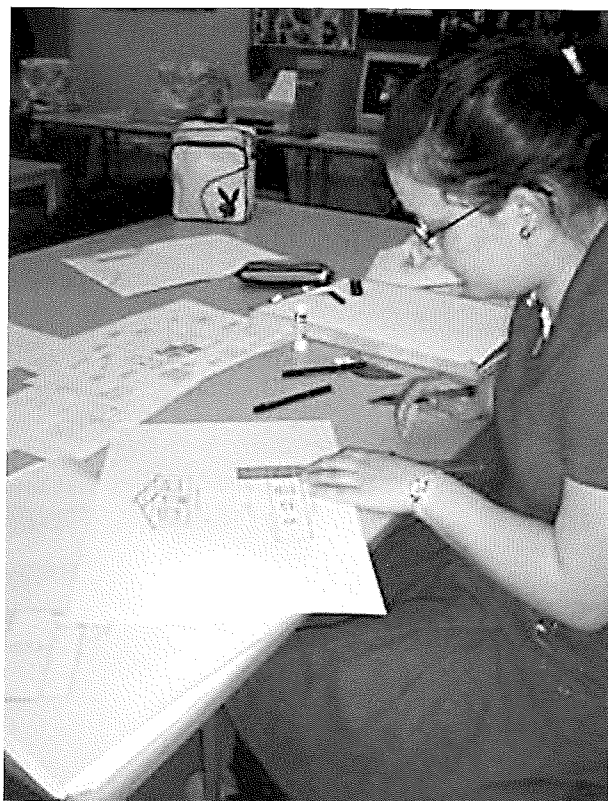

Housing & Design

Students have examined the built environment and investigated issues such as:

- What are the current trends in housing?
- What are our housing requirements and do they change?
- How to design houses that are comfortable to live in, energy efficient, aesthetically pleasing to look at and affordable.
- How to sketch, draw and interpret architectural plans

Excursions to Franklin House, a pole house at Windemere, a unit in Trevallyn, and a "spec" house in Prospect have added to the student's housing experiences.

Lifestyle & Fashion

Lifestyle & Fashion and Fashion for Fun students began the year by designing and making an outfit to wear to the Launceston Cup using paper and other disposable materials. Students modelled their creations in a mini fashion parade.

Following this, students designed and made bags and items using a commercial pattern. Students personalised their bags using a variety of surface decoration techniques.

During Term 2, Line 5 student Donna Wheldon (centre photo below) made a dress which she entered in the Apex Teenage Fashion Awards. Donna won the State final of the Casual/Day Wear section and travelled to Melbourne on 29 October for the National Finals. Donna won a sewing machine as part of her prize. She is to be commended on her terrific effort.

Other students visited the "Op" shops around Launceston to purchase items to remake, recycle and redesign. Some interesting items were made for just a few dollars. Term 3 saw students making a variety of gifts or items for celebrating Christmas.

Wendy Hays and Gaylene Allen

Food Studies Stage 5

This year in Food Studies has been "full on". We have had 2 classes of keen students. We have studied areas including nutrition, food choice, food spoilage and food science. Many guest speakers have informed us about different areas of the course. It has been a really interesting subject. Many different revision games have helped us to better understand the concepts studied. There has been a lot of group work which has allowed us to produce new, exciting food products and we have also cooked food related to course topics for invited guests.

We have found it to be a very helpful stepping stone for our future studies and life in general. Throughout the year there have been a lot of laughs and we have gained interesting facts to pass on to others. Thanks to the assistance and guidance of Wendy Hays.

**Rachael Brocklehurst
and Kellie Tunks**

LCFM 87.8

Launceston College offers a Certificate II in Broadcast Radio where students do work placement in the College's radio station, LCFM 87.8.

Students learn all aspects of operating a radio station and undertake most roles in the station. Students can expect to research and produce a variety of scripts, conduct interviews; record and edit sound and conduct their own radio shows throughout the year.

It is a real life situation where the students apply for various positions in the station, from programming, promotions, catering, audio technician, health and safety officers and announcers.

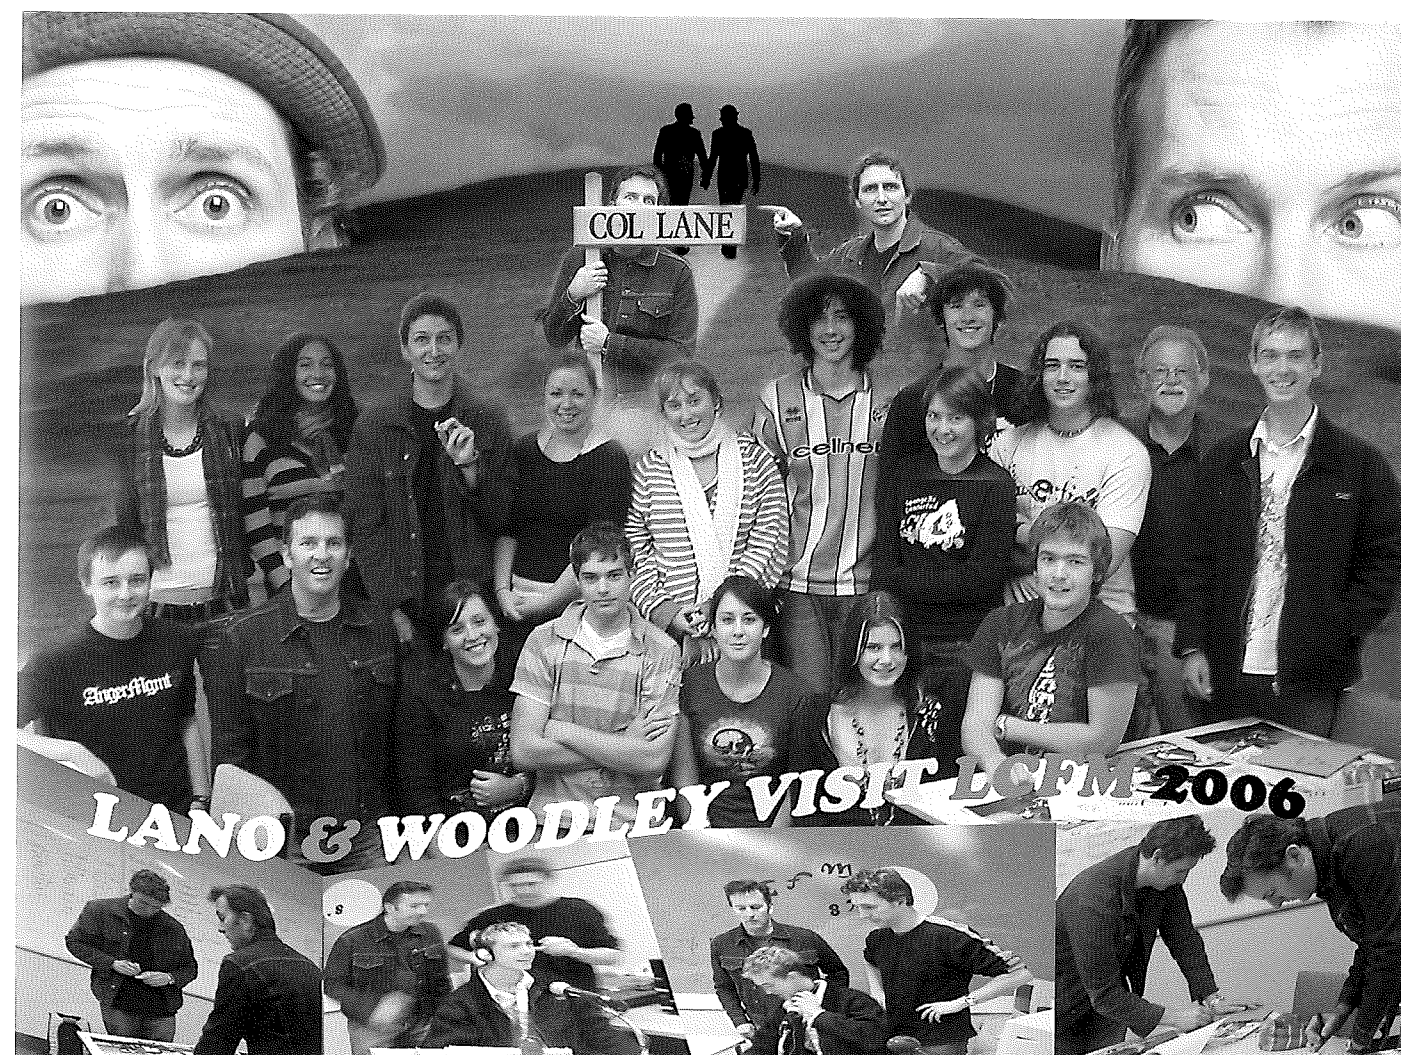

The visit this year by Lano & Woodley has given the students their first opportunity to put to air

a program they have researched and organised. Student Nick Roach was allocated the announcer/interviewer role for Lano & Woodley and this would have been a daunting task but he won them over. This was one very funny and classy interview.

The Go Set, the Hard Ons, and **Commitments** movie star and world renowned singer Andrew Strong were some of our more memorable guests for 2006.

LCFM caters largely for a young and young at heart audience but we have been known to play all types of music.

Richard Hodgetts
Station Manager/Teacher
LCFM 87.8
