First Day of Year 11

Principal's Report

Churinga is one of the great traditions of Launceston College – its goal is to capture the year that was; the people, the learning and the stories that invariably result from one year's interaction of 1500 people on a city block.

In some respects it is published too soon, as the student results of the year are not available at publishing time. Instead, to balance the social perspectives of the year book we have to indicate last year's student results and anticipate the ongoing improvements in student outcomes that have been characteristic of Launceston College over the years.

Last year's student cohort had the distinction of becoming the first in the state to reach an average of 80% Tasmanian Certificate of Education attainment. This was a remarkable achievement for the class of 2014, given the numerous alternative learning goals of students and the fact that this College has an open door policy to students – we are not selective of enrolments. Rather, this College has as its goal to work with each student who comes through our doors to support them to reach their potential academically and socially. The smiling faces of the students in the pages of this yearbook are evidence of a high achieving College, with a student body that feels connected to the life of their College.

I have the expectation that *Churinga* will inform the community of the class of 2015's high level student outcomes in next year's publication. Visitors to Launceston College frequently comment on both the quality of the physical learning environment and the excellent behaviour of our young adult students. The facilities here are constantly improving, and students from even 5 years ago would notice significant changes as our facility attendants continually make upgrades to ensure this College is a motivational learning environment.

As for student and staff interaction – the comment from visitors usually is that the atmosphere is more like a small university than a school, and that it is a working atmosphere that is reflective of the Launceston College tradition.

Year books become more valuable as the years pass. I suggest you sequester your *Churinga* away so that in ten years you can revisit the memories of what I sincerely hope has been a successful year at Launceston College, one that supported you in your goals for your future.

Keith Wenn

Student Representative Council

In 2015, Launceston College's Student Representative Council has been incredibly active and involved in the College community. We have organised and participated in several fantastic events. Thanks to the efforts of our members, both students and teachers, we have supported many charities and helped to improve our school life.

At the start of the school year, the SRC ran a 'Be Brave and Shave' event to raise funds for the Leukaemia Foundation. Eight volunteers shaved or cut their hair to raise awareness and funds for this charity. The VET Hairdressing class hair sprayed students' hair with many bright colours. Altogether, the SRC raised over \$800 for the Leukaemia Foundation. The SRC assisted with proposing a Facebook page for the College, which culminated in its eventual establishment. The SRC recognises the wide reach of social media, and has capitalised on this throughout the year to increase the publicity of events. Thank you to Henry Austin-Stone and Nathaniel Bott for formulating the proposal. To support 'The National Anti-Bullying Day', the SRC coordinated a campaign against bullying within our school. This saw students participating in a poster design competition in order to combat bullying.

Every year, we have students from Thailand come to our school for two weeks. The SRC helped to welcome the five visiting students from Suankularb Wittayalai College with coordinated tours, performances, and various social events. The SRC has been actively involved in the improvement of course delivery in our College, through assisting with the development of teaching standards. Keith Wenn, our principal, asked for our advice and opinions to gain the perspectives of some students.

At the centenary of Anzac Day Service this year, the SRC had a major presence at the Launceston march and service. Our members proudly represented the College during the march, and paid our respects with musical and dramatic performances, heartfelt speeches and a slideshow within our school.

The SRC has been involved with the World Vision 40 Hour Famine this year. We were pleased to make a sizeable contribution to World Vision, thanks to the kind donations of staff and students. We also have raised funds this year to aid the people in Nepal recovering from the major earthquake. To do so, we held a 'Colour Day', where we asked students to wear blue and bring a donation. As an additional fundraiser, the SRC enlisted the help of chef Nabin from the Black Cow restaurant, as well as our own Nepalese students, to make and sell traditional Nepalese dumplings. Overall, the SRC raised \$2018 for Oxfam.

An exciting opportunity arose for our SRC in the form of a Q&A session with the Launceston City Council. As young members of the community, it was a fantastic opportunity to voice our concerns and suggestions for a better Launceston. The breakfast program at LC has again provided our student body with free breakfast to students. Thanks to the support of the Launceston College

Student Representative Council

Association and the Support Team of Launceston College, this program has been running for many years and is extremely popular.

The SRC operated a 'Brain Break' session with science experiments and presentations, to showcase the wide range of sciences. We welcomed scientists Tina Oldham, John Adulcikas, and Chemistry teacher, Stephen Hindrum, to talk about future developments in science. Thank you to the Launceston College Association who provided significant funding for the event, and to Jodie Blackburn, Tika Varma, Jess Horton, Tyrone Blair and Rod Hutchinson for their support. The SRC assisted with the major 'Winter Art Exhibition' in August, assisting with the smooth operation of the event. Thank you to Tyler Hindrum and Joshua Newell for representing the SRC at the event. The SRC had a considerable influence upon the College Ball this year. The theme of the Ball was 'Hollywood Glamour', and the event was highly successful and memorable. The SRC assisted with the planning, organisation and set-up of the event.

The SRC, in addition to experiencing highest student participation this year than in any other year, has formulated formal guidelines for the operation of the SRC. The development of guidelines has been a year-long project, with the finished guidelines being presented on

19 October. Thank you to Henry Austin-Stone for writing the guidelines, and to Joshua Newell, Tyler Hindrum and Jess Horton for proposing amendments. Overall, the SRC has had a very successful and productive year. We hope to continue to contribute to the College at the same standard in 2016, and to maintain the increased popularity the SRC has experienced this year.

Thank you to all members of the SRC, as well as the staff who have supported us throughout the year.

Churinga Journalists

This years Churinga has been compiled with the assistance of the Launceston College volunteer journalists. Thank you so much to Monte Bovill, Phoebe Meyer, Claire Farrell, James Wells, Tyler Hindrum, Xena Jammias and Tyrone Blair. Your contributions to this magazine have helped to showcase the wonderful variety of activities available to students at Launceston College. Thank you and well done.

Carl Hinde
– College Publications Editor

English and Languages

English and Languages articles by James Wells

2015 has been a big year for the languages department. English is the largest learning area at Launceston College and is spread across three buildings. This year, students of all language courses have been offered many exciting opportunities to excel in their area of study.

In Term 2 this year, students of English Writing 3C were invited to a workshop held by published author and former LC student Lyndon Riggall, who talked about how to engage audiences, stand out as a writer and to be a successful author. In term 3, classes were again visited by Lyndon Riggall, who talked about sources of inspiration for the major writing project undertaken by students of the subject.

Last year, LC reintroduced Chinese (Mandarin) to the syllabus in response to

student requests as well as Australia's growing relationship with Asian countries. This year, students of last year's group progressed to the pre-tertiary level, learning all about language – practising to speak confidently as well as writing in Chinese characters – and the culture in general through video, audio and phone apps. This year's group was a mixed class of three pre-tertiary students and seven foundation students. This group has been given several opportunities to enhance their knowledge and their confidence in Chinese language and culture such as an excursion to *ChiChi Café* in St. John Street. In term 2 this year, Ms Yang Liu from Beijing, China visited the College to teach the students many fascinating aspects of Chinese language and culture. She taught students to make Chinese dumplings (or 'Jiaozi') which made quite a mess, but eaten with soy

sauce using Chinese chopsticks were a real treat. Everyone agreed that home-made dumplings were much tastier than the ones their teacher occasionally buys ready-made.

English as an Additional Language 3

In March the EAL3 class was joined by four young men who were visiting Launceston College from Thailand. This visit inspired two excursions of significant interest to our visitors and class members. Following a lesson based around local government, the class enjoyed a delightful visit to the Town Hall, the meeting place for the Launceston City Council. After a welcome and interesting presentation by Elizabeth Clarke, who explained some of the special features of the council crest and history, students enjoyed sitting in the Council Chambers and seeing the

table around which the aldermen and Mayor sit. Generous hospitality included an extensive morning tea, where we were joined by Principal Keith Wenn and Mayor, Albert Van Zetten. One of the Thai students played the grand piano and lots of fun photos were taken. It was also a wonderful opportunity for sharing knowledge and understanding between our group and the council.

Another insightful experience was a visit to the Newnham campus of UTas. Students enjoyed seeing the beauty of the campus and some of the upgraded

facilities in the Business Faculty. A special thrill was a visit to the Health Sciences faculty, in particular the area used in Nursing education. Students appreciated the presentation about the facilities and being trusted to 'hands on' experiences with 'patients' demonstrating real medical problems. It certainly inspired some in the group to consider Nursing as a future pathway.

Japanese

Debating

Launceston College had a very successful year with its debating team in 2015. There were a number of wins over Scotch Oakburn College and St Patrick's College, with the team finishing up 4th overall on the ladder. Congratulations to Scanlon Williams, Scott Cooper, Braydon Broad, Tyler Hindrum, Oliver Vogel-Reed, Phoebe Meyer and Elizabeth Reed.

Literature and Drama Trip

English Literature and Drama students were very lucky to go on a Sydney trip in August this year. The focus of the trip was to attend a performance of *The Tempest* at the Sydney Opera House by the John Bell Theatre Company. The performance was particularly special as it was John Bell's last performance as director of the company and it certainly lived up to everyone's expectations. Attending the play constituted a reward for the students in both departments who have worked hard all year; the Drama department having staged LC's own performance of *The Tempest* at the beginning of the year and literature students having studied the play as a text in class.

Literature students also visited Elizabeth Farm at Parramatta, to experience life on a colonial farm in connection with their study of Kate Grenville's, *The Secret River*. They also set sail on the harbour in a tall ship on the Saturday night to further their understanding of convict life in Colonial Australia. There was also time for some students to visit the Sydney museum. A wonderful time was had by all students and staff and we look forward to offering more combined Drama and Literature trips in the future.

Gill Pitt - English Literature Teacher

English and Languages

English as an Additional Language 3

Run for a Wish

On Saturday 17 October 2015, Habib, Semira and Huda participated in "Run for a Wish" in Launceston. This annual event is a wonderful fundraiser, with all proceeds going to "Make-A-Wish" Australia. The funds raised grant wishes to children with a life-threatening medical condition. The event is about encouraging family and friends of all fitness levels to participate in a fun run event, enjoying the benefits of exercise and an active lifestyle while supporting a worthwhile charity. Habib, Semira and Huda all wanted to enter as a way of contributing to the cause and also because they enjoy running. It was a fantastic effort on the day, with all of them coming in the top 150 runners in a field of over 300. Well done!

**Run for a Wish: Left to right:
Habibollah Heidari, Semira Hadish
and Huda Ali.**

RYDA

A group of 23 students spent an information packed day at Symmons Plains participating in the RYDA Road Safety Education Program. The Program is directed towards our young people educating them about road safety as they approach that period in their life when they start driving a car and ride as a passenger in a car driven by one of their peers.

The students attended 6 information sessions which included (1) Speeding and Stopping (2) Hazards and Distractions (3) The Personality Test (4) Rights and Responsibilities (5) After the Crash and (6) Genevieve's Story. All the sessions were packed with useful information for learner drivers. The Speeding and Stopping session was particularly interesting as we all witnessed the difference of just 10 km/h has on the stopping distance of a 4 Star rated ANCAP car.

The After the Crash session really opened our eyes and hearts as we heard the story from a young woman who was involved in a crash which resulted in an acquired brain injury. She spoke about how a moment changed her life and the life of all that knew her forever. We all left that session feeling grateful that she had the courage to share her story. Overall it was a great day and we learnt a lot about car and road safety. A big thank you to the Rotary Clubs of Launceston for your organisation prior to the event and throughout the day.

**Left to right:
Jestina, Alisha
and Dorothy**

Momo Day for Nepal Earthquake victims

In Term 2, approximately 25 EAL students and SRC members came together in the Undercroft to make and sell momos to raise funds to assist the Nepal earthquake survivors. Under the guidance of Black Cow Chef, Nabin Gurung, the students made over 1500 momos. Momos are traditional Nepali food made from a mixture of onion, cabbage, garlic, ginger, masala, oil and salt. A small amount of the mixture is placed in the middle of a momo wrapper which is then folded together. Momos are then steamed for about 10 minutes before being ready to serve with a tomato, onion and chilli sauce. The students made \$518 to donate to the earthquake cause. A big thank you to Nabin and College staff for your support in making this wonderful event happen.

SNAP Finalist 2015

As part of their annual photography competition, Launceston Church Grammar School hosted 38 young finalists at their school gallery on 24 July. Students from Year 9 through to Year 12 were selected from a range of schools in Northern Tasmania. Vanessa Clarke, Monte Bovill and Sushil Subba were selected from Launceston College. The finalists had to take photos in response to a 'scavenger hunt' of 20 words or phrases, such as: *orange, divide, flow, camouflage, transformation, bring it on, and 'I'll be back'*.

The finalists were all very excited about being selected and reflected on their experiences:

Monte Bovill: "It was hard to think of a theme to connect all the photos together. All my photos in the end were taken in the same shop. I was very happy to be selected, it was a good venue to be displayed in. I enjoyed taking a picture of 'crumble' because I bought an egg from the shop and smashed it. The most difficult photo to take was 'transformation'."

Sushil Subba: "It was my first time entering. I built on my knowledge and creativity. I enjoyed taking a photo for 'flow'."

Vanessa Clarke: "It came as a shock to be selected. I had a lot of fun on the scavenger hunt and I put a lot of thought into what I could photograph. Some words were harder than others. We used all the skills we learned in class. 'Solitary' was my favourite photo."

All the finalists said they would definitely be entering next year!

Sushil Subba

Performing Arts

Dance

The Dance department has had an incredibly busy, yet exciting year in 2015. Students from both level 2 and 3 classes have participated in many choreographic workshops and have had several opportunities to perform in both formal and informal settings. At the beginning of the year, the level 3 students had the opportunity to work with former student, and VCA graduate, Jamie McDonough. Students worked on a variety of technique exercises and movement sequences to further develop their dance skills. In Term 2 all students had the opportunity to perform their choreographic works for their friends and family. Performing their work publicly proved to be a very daunting yet exciting and valuable experience for all of our students. Term 3 saw all level 3 students working incredibly hard to prepare for their mid-year exams, whilst the level 2 students worked collaboratively as a class on a dance piece for *Dance Fever*.

Our Sydney trip in August saw us combine with Drama and English to take over 70 students away. The students had the opportunity to participate in dance workshops at Brent Street, Sydney Dance Company and Dance Central. We were also very fortunate to attend the official opening night of the musical, *Matilda*. Students were enthralled by the high degree of talent and precision displayed by the performers.

It has been a fun, challenging and rewarding year for all dance students and we would like to thank all students for their hard work over the year. We wish all Year 12 students the very best for their bright futures.

Tanya Lanham & Sophie Lucas - Dance Teachers

Performing Arts

Dance Fever

Dance Fever is the Launceston College Dance extravaganza which was held at the Door of Hope on 23 and 24 September this year. This program gives students from diverse backgrounds an opportunity to learn and perform a variety of styles of dance in a welcoming, supportive and fun environment. This year's show 'Moments' included many high school students from Prospect, Riverside, Brooks, Kings Meadows and Queechy High Schools who worked alongside the College students to become a part of this program. We also had over 200 primary students who worked with our high school mentors to be a part of this show.

We would like to extend our thanks to all our primary and high school teachers who assisted and supported their students in this program. We also sincerely thank our Performing Arts team for their incredible support. However, without our talented and hardworking students we would not be able to produce a show of such a high calibre. Labelled the best one yet, we look forward to next year and what it may bring!

Tanya Lanham and Sophie Lucas - Dance Fever Co-ordinators

Performing Arts

Drama

The year started with a refurbishment of the Drama area and the works that had been going on over summer were still being finished as the Year 11s made their way into the Drama Room on the first day of school, with final carpet tiles being laid as we started our first lesson. The staff and students have really appreciated the College's support in this development and it has made for an amazing learning area in 2015. We look forward to an extension being built on the Eastern side of the area over the upcoming summer to house our technical production requirements.

Our first production for the year was *The Tempest* which was a co-production with UTAS and was performed in February at The Annexe Theatre. This is the fourth Shakespeare play we have performed biennially and was produced in part to support the students in English Literature who were studying the play. It also gave all Drama students an early play to watch for critical appraisals. The play starred teachers Cheyne Mitchell and Travis Hennessey, alongside Stephanie Francis, Lachy Murphy, Hamish White, Freya Allen, Meg Sydes and Maddie Leslie; with UTAS theatre students making up the remainder of the cast.

Term 2 started with the Theatre Performance classes presenting their mid-year plays *After Juliet*, *The Sea* and *The Children*. These classes then presented the highly popular Avant Garde performances which was a fantastic end to the term. In Term 3 the Drama 3 classes performed two versions of *The Arabian Nights*, one a more traditional poetic version and the other a fantastic piece of physical theatre.

Term 3 also saw 38 students and four staff travel to Sydney for three nights for a Drama Trip which coincided with Dance and English Trips. Highlights included a visit to NIDA, attending the opening night of *Matilda*, tours of the ABC and Sydney Theatre Company, a workshop

Performing Arts

with Paige Rattray and a performance of Bell Shakespeare's *The Tempest* at the Sydney Opera House.

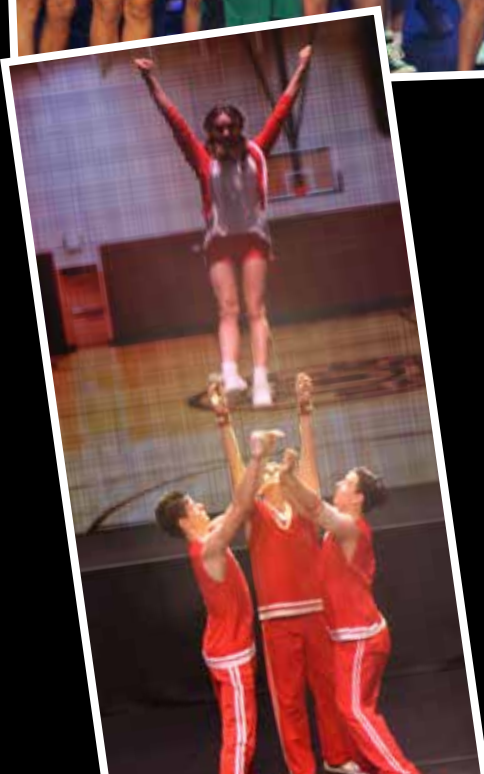

Cheyne has been lucky to work with a fantastic Level 2 Drama class who presented a Children's Theatre piece based on *The Boy who Cried Wolf* and a great Technical Theatre class who have helped with many of the shows in Drama and in the local community. A highlight for this class was running *The Junc Room* at the Junction Arts Festival in September.

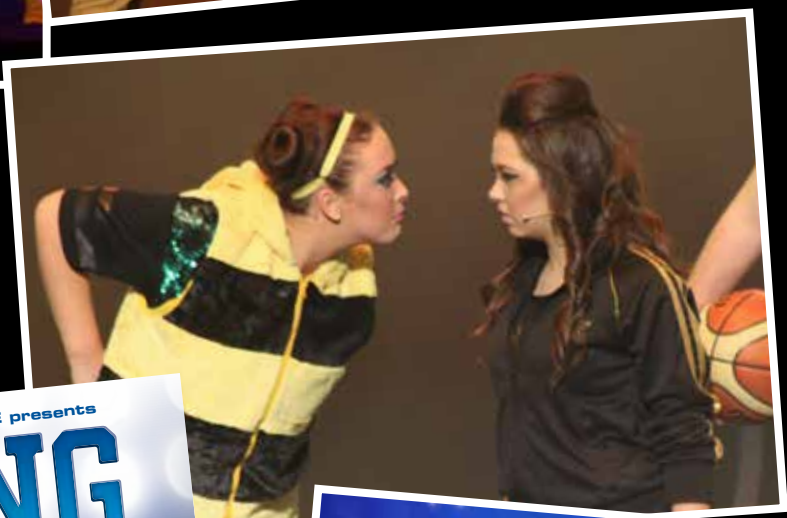

Our thanks to the VET students and Grade 12s in this class for their work over two years and their support in stage managing all of our shows – Freya Allen, Zoe Bennett, Lauren Dell, Zeth Green, Tori Siebert and Marc Brient-Zankovic.

At the time of writing we are in the middle of the Drama exam week with all shows and groups going really well. The Theatre Performance shows of *Hersey of Love*, *Mermaid* and the devastating *Pronoun* have been exceptional. We thank all of the students who have worked in the area for their hard work and dedication over the year. We especially thank and bid a bittersweet farewell to the amazing Year 12s, many of whom have been involved in so many projects over their two years at the College. We wish them all the best for what the future has to offer.

Liz Bennett, Nicole Lewis, Nicole Lockwood and Cheyne Mitchell

Food, Fashion, Hospitality, Housing and Hairdressing

Hairdressing

Students enrolled in Certificate II in Hairdressing enjoy participating in Salon on each Thursday. During this time students carry out treatments, colouring, blowdrying and braiding services on clients, giving them the opportunity to develop 'hands on' skills essential to working in the industry.

VET Hospitality

Personal Image Artistry

Develops students skills and knowledge in the areas of skin care, by analysing skin types and recommending products to ensure optimal skin condition, and designing and applying make-up for functions from every day wear to special events.

Food, Fashion, Hospitality, Housing and Hairdressing

Food and Nutrition

Laura Bugg and Alexandra Van Winden

Nikki DeWit and Emily-Jade Smith

Shantal Hoekstra and Sabrina Guy

Housing and Design

Daniel De Ruiter and Brad Dean

Maegan Williams

Zach Gray and Tom Leung

Student Support

The Student Support team has continued to be highly active around the College in 2015 and has been engaged in a range of activities to enrich students as they pursue their goals. The support team had a presence in:

- The Breakfast Program
- World's Greatest Shave Day
- You Day
- Orientation days
- SA program sessions including cyber-safety, mental health, drugs and social justice issues
- Final day celebrations
- Individual student support

Thanks to all staff and students who have helped in making these programs and events possible.

Gaylene Allen
Assistant Principal for Student Support.

Maurice Hogan, Peta Bishop, Suzie Dewis, Tika Varma, Ged Egan, Monica Foley and Tori Harrison, Inset: Ben Kromkamp

Learning Support

Congratulations to

- Sebastian Kemp and Patrick Taylor who completed the course requirements for Everyday Mathematics as well as the Level 2 course Essential Skills – Maths, through Flexible learning.
- Simon Slowitzky, Patrick Taylor and Aleisha Panton who completed Tutor Support/Work Experience during the year. Simon worked with a Landscape Gardener, Patrick was a Barman and Front of House employee and Aleisha worked as Front of House also.

Movie Nights

Students in Learning Support have been able to attend the movies at Village Cinema together during Terms 3 and 4. Costs have been limited to \$2 per student. Some of the movies they have enjoyed include: *Mt Everest*, *The Maze Runner*, *The Martian* and *The Man from Uncle*.

Exceptional Endeavour Award

During 2015 Patrick Taylor has proven the benefit of intensive effort and a 'can-do' attitude. His exceptional effort and progress were recognized by him being awarded subject certificates for Practical English, Everyday Mathematics, Food and Cooking Essentials as well as an Exceptional Endeavour Award.

In Memoriam

On behalf of the Launceston College community, our sincere condolences go out to the family and friends of Matthew Wilmshurst and Jake Fitzpatrick. Their young lives were cut short in tragic circumstances this year and their passing has had a significant impact on many students and staff.

The families of both Matthew and Jake (Fitzy) and College support staff were heartened by the way in which the friends and peers of both students came together to pay their respects and remember their friends. Although their time at College was short, they will be remembered fondly by many.

Centenary of ANZAC

My ANZAC Experience

On 16 April I was one of seven Tasmanian students who were chosen to venture to Gallipoli for the ANZAC Centenary. This was an unbelievable honour and I knew it would be a surreal experience, especially as I had never travelled overseas before. The trip was for 14 days between Istanbul and Gallipoli, two completely different and incredible places. One thing that amazed me throughout the trip was the Turkish people and the love they have for Australians. The ANZACs were defeated at Gallipoli, but their fighting spirit that held the Turks up for months on end is the reason they commanded the Turks' respect, and why the Turkish people welcome back Australian visitors with open arms. I took a small Australian Rules football with me and throughout the trip I was surprised to see the locals' response to it. We often found ourselves having a kick with them!

We made our way to the dawn service at 8pm the night before, rugged up in seven or so layers. We got through the cold and windy night but no one complained as we all knew this was nothing in comparison to what the ANZACs endured. The sun began to rise and I'll never forget one moment in particular. The minute of silence was touching with not a sound made by any of the 10,000 people there. This is where the ANZAC legend was born 100 years ago.

This was truly an experience I will never forget and I would encourage each and every person to visit Gallipoli in their lifetime if given the opportunity. The ANZACs gave their lives so we could live ours.

Jack Soward - Student

To commemorate ANZAC Day and the one hundred year anniversary of the Gallipoli landing the College had a focus on World War I over April 23 and 24. The short play ***Dig for the Diggers*** was staged in the theatre six times. Directed by Year 12 student Hamish White the play focused on the battle of Fromelles, the first major battle fought by Australian troops on the Western Front. Over 500 casualties were recorded on the first day, the worst of any battle before or since.

LC Vocal Ensemble performs 'And The Band Played Waltzing Matilda' at the ANZAC Day Assembly.

Health and Physical Education

Cross Country

On Tuesday 30 June, six students from Launceston College competed in the Tasmanian Secondary All Schools Cross Country event at Symmons Plains Raceway. Well done to Courtney Stanley and Toby Sparkes who placed in the top 5 for the Under 20 events which saw the boys run a 6km course and the girls a 4km course. A great effort. Well done also to the VET Sport Coaching students who were involved in various roles leading up to the event and on the day.

Students involved:

Braydon Bennett, Toby Sparkes, Jarrod Bailey, Courtney Stanley, Kaleb Clark and Lawrence O'Toole.

Courtney Stanley

Lawrence O'Toole

2015 Sporting Hall of Fame

Launceston College has had a vast array of State and National representatives in sport this year, which is reflective of the talent of our young people. Congratulations to the following:

U/18 Australian Rules Football

Marcus Haley
Mitch Hodgetts
Jack Donnellan
Will Fisher
Shaun Worker

U/18 Hockey

Keelan Beattie
Alissia Pearson

(as well as Open Indoor Hockey,
Umpire for U/15 and U/16 Hockey)

U/18 Cricket

Callum Harrison

U/18 Indoor Hockey

Alissia Pearson
Bronty Lynch

U/18 Touch Football

Oliver Robinson
Mackenzie Nason
Emily Nason
Ricardo Gugliotti

State Cycling

Ewan Ferrier
Hayden Di Cocco-Grant

Outdoor Education

Health and Physical Education

Technology and IT

Computer Graphics and Design

This year, students from our Technology and IT classes have been working on a combination of sketching interior and exterior designs as well as modelling. Students have also learnt to experiment with animations and architectural designs. Throughout the course of the year, students were required to model a spaceship and convert a shipping container into a house, designing the interior and exterior designs for both tasks. In order to complete these tasks, however, students had to overcome the hurdle task of learning how to navigate new and complex software.

The Major Project entails some major critical thinking and planning stages, here are just a few:

- Annotated inspiration images
- Evolutionary design sketches
- Final design drawings and story boards
- Screen capture (print screen) images
 - annotated to describe what was occurring at that stage
- Final rendered images
- Animation (edited in Premier / Movie Maker
 - include soundtrack / sound effects)
- Project evaluation
- Folio presentation

Design student, Alex Magnotta has really enjoyed working on his Major Project this term.

“Modelling has been the most interesting aspect to the course.”

Design student, Ethan Jones has also enjoyed the Major Project and particularly enjoyed working on the modelling and interior designing for his major project. Ethan says students thinking about joining the class in 2016, should be prepared to put in a lot of time and commitment to the course as it can be demanding. However, Ethan has enjoyed the course, and urges anybody who is interested in design and tech to think about this subject.

Attached are some great still shots of interior design work from students, Alex and Ethan.

From the course, students have learnt skills that will allow them to easily adapt to work environments in the fields of animation, architecture and design. Well done to the IT and Tech classes on a great year.

Xena Jammias - Student

VET Construction Pathways

Students have enjoyed a busy year undertaking a wide range of theoretical and practical activities related to the construction industry. The course introduces students to many basic but crucial elements of the industry including: calculations, plan reading, communication, organising and working effectively, all blanketed with a Workplace Health and Safety focus.

Students have had the opportunity to work individually and in groups on practical tasks ranging from formwork for slabs on ground, setting up profiles using laser and dumpy levels to hanging doors and fitting passage sets.

The course is structured to replicate industry practices. Therefore students use an array of hand and power tools and techniques that reflect current industry trends. Students also have two blocks of work placement that provide them with real world experience.

I would like to thank the many local construction companies that support our students by providing work placement opportunities and all the hard working staff in the technology learning area.

Ben Luttrell - Teacher

VET Certificate I in Engineering

Students have been very busy this year gaining knowledge and practical skills related to the metal fabrication industry. There has been a big focus on Workplace Health and Safety and the wearing of Personal Protective Equipment. They also have had other units regarding planning an activity, working in groups and plan reading.

The students have had industry related training for that hands on experience. They have worked on making small projects on the lathes, using manual metal arc welding machines and cutting plate with the oxy acetylene process.

Well done to the students who have satisfactorily completed the units. These units are recognised towards an apprenticeship in the fabrication trade.

Peter Robinson - Teacher

Technical Graphics

During 2015 students who chose to study Technical Graphics were required to complete two major projects as part of their learning. The first project was free choice design and the second was renovating an older style house and bringing the design into the 21st century.

Design & Production – Wood

In Design & Production Wood students are set two small projects at the start of the year. They then go on to construct a timber project of their choice. Students learn how to safely operate a large number of hand held and power tools as part of their learning.

VET Certificate I in Furnishing

Students who chose Certificate I Furnishing are required to complete a small wooden toy as part of their learning. The toys are then donated to a worthy community cause. Students complete eight units to gain their certificate. Students construct an item of furniture as their major project.

International Students

Once again it has been a pleasure to work with such a wonderful group of International Students. We appreciate the contribution each makes to Launceston College. Congratulations to Sila Han who won the *International Student of the Year Award* at the 2015 Study Tasmania International Education Shine Awards in October.

We particularly wish the Year 12 International Students all the very best as they embark on their further studies. This particular group of students has been outstanding. They have been focused on their academic achievements, worked extremely hard to build and improve their English skills and have been a most kind, mature, considerate and well humoured group of young adults. You will be missed and we look forward to following your future successes.

Libby Williams
Assistant Principal

Year 12s

Han Trinh

Nationality:
Vietnam

Best things about LC:

All the teachers are really enthusiastic and help me.

College provides the best facilities and opportunities for students to do their best.

There is no barrier between teachers and students.

Most memorable experience of 2015:

Dissecting rats in Biology– I felt like a real surgeon.

I became one of the students who achieved high grades in Maths after working really hard.

Making a lot of good friends who support each other physically and 'chemically' during the year.

2016 I am going: to study a Bachelor of Pharmacy at UTAS.

Nguyen Truong Au (Alex)

Nationality:
Vietnam

Best things about LC:

Friendly students and staff members.

Variety of courses to choose from.

Very helpful towards International Students.

Students are allowed to be responsible for their choices.

Most memorable experience of 2015:

Doing Physics experiment of wave at Science Fair.

2016 I am going: to study Naval Architecture at Australia Maritime College (AMC)

Sila Han

Nationality: South Korea

Best things about LC:

Welcoming environment and the acceptance of students from a range of backgrounds.

The continuous support from teachers and peers to broaden my intellectual horizons and striving to perform at my highest potential.

Most memorable experience of 2015:

LC Ball and International Student excursions.

2016 I am going: to the University of Melbourne to study a Bachelor of Biomedicine.

Xiaoxing Chen (Colin)

Nationality: China

Best things about LC:

Lovely teachers and friendly students.

Most memorable experience of 2015:

Maths Exam papers from past years!

2016 I am going: to study a Bachelor of Business at Monash University.

Yi Chun Je (Nicholas)

Nationality: Hong Kong

Best things about LC:

Nice and kind teachers.

I love the subjects.

Most memorable experience of 2015:

The LC Ball, especially the dancing section.

2016 I am going: to study a Bachelor of Business at a university on the mainland.

Grace Suresca

Nationality: Philippines

Best things about LC:

Fun activities.

Meeting different people and making new friends.

Learning how to cook and make cocktails and mocktails.

Most memorable experience of 2015:

Watching Bring It On at the Princess Theatre.

2016 I am going: to TAFE to study Certificate III in Kitchen Operations as I wish to gain an apprenticeship as a chef.

International Students

Year 11s

Rebecca Chang

Nationality:
China

Most memorable experience of 2015:

Trip to Southern Tasmania and visit to UTas – Newnham.

Lynn Fan

Nationality:
China

Best things about LC:

I can choose to take subjects that I'm interested in.

Learning to manage study time.

Living with my lovely Homestay family.

Zhui Ye (Miko)

Nationality:
China

Best things about LC:

I can cook by myself.

I can make friends with people from other cultures.

I enjoy having a free breakfast at College every day.

Sze Hoi Hung (Ricky)

Nationality:
Hong Kong

Best things about LC:

The big spaces and the teachers are very kind.

Wong Kai Yin (Edwin)

Nationality:
Hong Kong

Most memorable experience of 2015:

LC Ball

Jiayi Wu

Nationality:
China

Best things about LC:

Making friends and meeting different people and studying Music.

Jackson Zhang

Nationality:
China

Best things about LC:

Going to special places such as Hobart.

Joao Lucas Garcia Hirsch

Nationality:
Brazil

Most memorable experience of 2015:

Working at Dance Fever, doing the lights and technical things.

Maths

Maths, it's more than meets the $\sqrt{-1}$

(that means $\sqrt{i^2}$...i...eye... )

The world of Mathematics is more interesting than what you'd expect!

Launceston College offers a variety of maths courses as maths is an essential skill for a productive future...no matter what level you intend to study and no matter what career you intend to follow. All our maths courses are challenging, rewarding, interesting and a great way for students to meet new people and broaden their horizons in the world of mathematics, regardless of the level studied.

Students have the opportunity to be involved in activities outside the classroom too by 'having a go' in the Australian Maths Competition or the Urquhart Maths Competition, or by putting together a team for the Maths Relay that is held at a local school. There is even the chance to get involved in our own Fun Trivia Maths Competitions at our You Day stall in Col Lane at the beginning of the year.

There are plenty of opportunities to extend the maths learning outside of the classroom and to create some fond memories. Our very successful

participants in the Australian Maths Competition this year were: Sila Han, Jess Horton, Hannah Wilcox, Chris Bounds and Scanlon Williams.

Workplace Maths and Everyday Maths give students the necessary skills required for many occupations. Classes are full of interesting, practical activities and build on previous skills to ensure that once in the workplace, their maths skills are solid. The learning in class is centred on developing good techniques and making sense of numbers by applying maths to real world activities and problems.

General Maths 2 and 3 apply lots of equations with a practical approach to Mathematics. Students in these classes

learn valuable skills in finance, world geometry, bivariate data, growth and decay and network analysis- essential skills for those who want a solid grounding for future success. The course has a strong emphasis on applying maths to real life investigations and activities.

Maths Methods levels 2 and 3 are pathways leading to understanding the roots of mathematics and how to apply maths to the world to make life easier. Students focus on learning algebraic techniques and applying them to real life. For all the people who doubt algebra's importance, algebra is designed for the philosophical thinkers and mathematically inclined... it's a tool that allows you to do the maths now and worry about the numbers later (usually in front of a calculator).

Specialised Mathematics 4 is the most challenging maths course offered at LC and it gives its students a deeper understanding of the fantastic world of maths. Students learn about imaginary numbers (literally), weird ways to multiply numbers, how to sum patterns of numbers and how to use numbers more efficiently. Numbers, numbers, numbers! The use of all these techniques varies from engineering to quantum mechanics to economics and business, but it goes to show that a deeper understanding of the world of maths is a valuable tool.

No matter which subject you study, you will learn and improve your mathematical skills in a supportive, inspiring (and at times even a slightly humorous) environment. So on that note we'll leave you with a joke...

Louise Searson - Teacher

What did the
zero say to
the eight?

0 8

Nice belt!

Science

This year the Young Tassie Scientists inspired great things at Launceston College. In April a few scientifically dedicated students travelled to Hobart for a Science Forum held by the Young Tassie Scientists, a program run by UTAS to inspire science among youth across all educational mediums. From this event these keen students brought back the idea of the Big Brain Break, essentially a morning tea dedicated to science discussion. This would be aimed at increasing scientific interest among those who cower away from the great challenge of science. As soon as school resumed, SRC meetings were held to organise the event which was to be held during National Science Week. Soon, this event turned into a whole day dedicated to science and then to the whole week, dedicated to all realms of science, from Biology to Chemistry to Physics. After many months of organising, planning and cake baking the week began. It started with a visit from the Young Tassie Scientist, John Adulcikas, who gave a talk on his work in Microbiology. John is doing a PhD about his research into the bacterial conditions of estuaries in Tasmania, looking at regions where particular bacterial life lives. His work may be used to indicate where more stringent farming procedures are needed, and to indicate sources of safe water for drinking and swimming.

The biggest event during Launceston College's science week affairs was an entire day devoted to educating the wider Launceston College Community about the wonders of science. With more than 20 *Science Heroes* running a myriad of activities. In Biology there were a number of sheep plucks being dissected, a table showing transpiration

in celery, UV light showing how dirty we all truly are and a number of models of many things, from hearts to lungs to cells. For Chemistry there were splints that all burned different colours from red to green, blue and pink, super saturated solutions which turned solid when poured, a solution which changed colour when stirred and the always coveted elephant's toothpaste.

Finally for Physics there were a number of experiments showing gyroscopic progression where a wheel was spun which could then be used to direct a person on a wheeled board. Another similar experiment showed the wheel being spun and then balanced on various points on the *Science Hero's* body, such as the chin, finger and leg. Finally, there was a pendulum wave experiment showing how energy spreads through waves. A number of brass balls were suspended incrementally onto a frame which when let go, the balls formed many amazing patterns. This day proved to be absolutely amazing, with many non-science students having a scientific

experience for the ages. To finish the week we had two more speakers, Tina Oldham and Stephen Hindrum. Tina is another Young Tassie Scientist who gave a talk about her work in Marine Ecology and was also attended by many students from many different science backgrounds. Stephen's talk was about Quantum Mechanics and featured Angie the quantum tunnelling dog as well as some roses. His talk explored how quantum mechanics is the next stage in scientific discovery and how it may be everywhere, from flowers to dogs.

National Science Week at Launceston College has been a huge success and would never have happened without the stellar effort from Madiyantika Varma, Jess Horton Jodie Blackburn, Tyrone Blair and Rod Hutchins.

Chemistry 4

Chemistry is another pre tertiary science course offered by Launceston College. It is one of the two science courses to be dubbed a 'Level 4', because level 3 wasn't terrifying enough. Our year in Chemistry has been an amazing one, with many great colours, explosions, smells and antics. Through titrations and timer reactions we have seen many a pretty colour, from pink to deep orange to peach to deep black. We have also seen our fair share of explosions, although generally at the hand of particular students. Through the Esters practical we have also created a myriad of smells, from apple to orange to sarsaparilla to vomit. Thanks to Jodie and Roberta for their great sense of humour and amazing teaching.

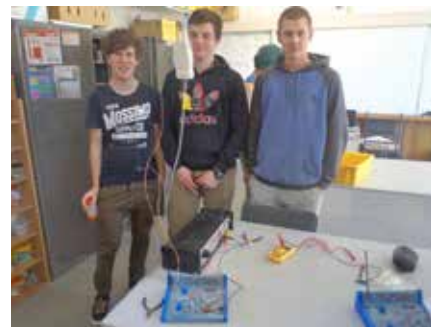

Electronics 2 & 3

This year the students from level 2 have constructed a myriad of circuits, from portable speakers to ear piercing fire alarms. Along with this the students of level 2 have also applied their knowledge to construct welders and other such equipment, turning theoretical knowledge into concise experience.

The students from level three have, however, had a much more theoretical year, but it has not been without entertainment. From new digital equipment to counting circuits to River's and Jason's antics, this year has certainly been memorable for the students. The smell of solder and burned capacitors will forever be imbued in minds of the Electronics classes for 2015, as will Jason and his quirky but effective teaching methods.

Bradley Burt with completed FM radio kit in front of his finished, wired-up room.

Brodie Sward, Caleb Newman and Nick Martin

Sam Broomby with his FM radio kit.

Zac Griggs getting electrical supplies

Biology

Biology is a rigorous pre tertiary course offered by Launceston College. The 20 page information booklet says it all. One of the most interesting practicals of the year were the dissections performed on a lamb's pluck and a rat, the smells and sights of which will forever be with the students. Biology has taught its disciples of 2015 many things, such as onions and celery are actually useful and just how bountifully complicated the human body really is. I would like to thank all the Biology teachers, Jane, Rosalie and Tika and Barry the lab technician for such an amazing year.

"But Tika, that sounds boring."
"Well you, will make it interesting won't you."
 – Tika telling it like it is

Life Sciences 2

The Life Science Students of 2015 have had an interesting year. From hands on sheep pluck dissections, to poisoned kidney investigations to visits from Steve, our resident skeleton, this year has had many a memorable moment.

"This class is amazing, would do again"
 – the entire class

Science

Environmental Science

For the environmental classes of 2015 the crisp smell of fresh air will forever be with them, as they travelled all over the state to places as far as Badger Head to some as close as the Tamar River. These excursions have given the students a wide variety of knowledge and experiences they may never forget. Something they may never truly forget is the sheer amount of handouts they receive, which many seem ironic given the subject.

**Science articles by
Tyler Hindrum - Student**

Science Awards

Congratulations to

Jess Horton who achieved a High Distinctions in the Rio Tinto Big Science Competition.

Congratulations also to Chelsea Webb, Emily Scott, Hannah Wilcox, Laurinda Bain and Vasili Rokas who were awarded Credits.

Physical Science 2 & 3 Physics 4

Physical Science classes of 2015 have seen many a humorous moment, including Jason throwing rubber balls to show flexibility to the shoving of people to show momentum, to the accidental spilling of concentrated H_2SO_4 . Through these experiences the students have applied their knowledge to learn through physical application in a humorous manner. The students have also witnessed a myriad of pretty colours, seen so often in Launceston College's science department, through titrations and many other practicals. Thanks to Jane, David, Roberta and Jason for a memorable year.

Physics is one of the College's harder science courses, containing elements from three other pre tertiary classes; Chemistry, Electronics and Maths. Jason's students received a warm welcome to the course, with their first practical being about burnouts to show inertia. There were many practicals, such as throwing eggs from a height and accurately getting them in a bin. These students have had many a practical experience to apply their theoretical knowledge. This has led to a truly outstanding year. These students will never forget Jason and Udo's engaging classes and the friendships forged in this enjoyable class.

Business and Legal Studies

"This is a valuable class for setting me up for the future." - Georgia Clark, Y11 Business 3

This is a constant theme of students who have studied Accounting, Economics, Business and Legal Studies and the VET courses of Business, Retail and Tourism at Launceston College in 2015.

Authentic experiences are a feature of these subjects and this involves guest speakers, visiting relevant agencies and participation in work placements. Examples include Business students going to 'Meet the Business Leaders', Economics students attending the 'Budget Breakfast' at the Casino and Legal Studies students undertaking court visits and going to 'Lawfest' in Hobart. Opportunities were also provided to speak to those in occupations linked to this study including lawyers, Launceston College's police officer, Ben Kromkamp, and politicians such as Tasmanian Greens Senator, Peter Whish-Wilson.

Business 2 Students ran a cupcake day for the RSPCA in Term 3, *"where I developed my teamwork and organisational skills. This experience will help me with organising business events in the future... I am looking to studying Business 3 in 2016"* - Caitlin Clive, Y11 Business 2

As an extension, some Level 3 students participated in the UTAS College Program at the Tasmanian School of Business and Economics.

In the VET classes, students engaged with work placements in many out of College businesses including school offices, hotel receptions and retail outlets, providing better insight into the expectations of future careers.

One of the students who had this opportunity was Sarah-Kate Tomkinson who had placements at both the Sebel Hotel and the Star Bar Café through VET Tourism. She commented that the experience of working in a real world environment was very beneficial. She gained employment at the Star Bar Café and stated that VET Tourism *"has helped me in a big way. I have gained a lot of experience."*

It certainly has been an action packed year in Business!

Monte Bovill - Student

Humanities and Behavioural Science

Australia in Asia and the Pacific

In Australia in Asia and the Pacific, also known as AAP, students have had a busy year. A lot happens in our region, and as the year unfolded our level of understanding deepened. The year saw tragic natural disasters such as Cyclone Pam in Vanuatu, and the Nepal Earthquake. Our study of why earthquakes and cyclones occur, and of these countries in detail, added a layer of depth and understanding to what was happening for the people in these places.

The unfolding refugee crisis prompted us to look deeper into the experience of refugees and government policies over time. It has many of us reflecting on what we would do if it were us and not them.

But it was not all bad news, as we explored the tourism industry in our region, and the costs and benefits to both Australian destinations and the wider region; we are all planning our next holidays with eyes wide open!

Exploring our nation's multicultural culture was enriched by an Indian lunch and a Bollywood movie, which was enjoyed by everyone – food being one of the more obvious ways in which our culture is enriched by migrants. In short, we have come to appreciate just how diverse our country and the Asia Pacific region are, in both the people and the environment.

Modern History

In Modern History the class has studied three major units over the course of the year. To start the year they focussed on Germany between 1918 and 1945, looking particularly at the drivers of change. Next they looked at China between 1949 and 1976, the years in which the nation was under the communist rule of Mao Zedong. This was followed by a study of the U.S.A. which was compared to China. Finally they studied the Cold War and looked at the differing perspectives of historians.

Students who went on the Humanities trip to Melbourne were able to meet Lucia, a Polish survivor of the Holocaust, who told us of her life during and after the Second World War. Her story was truly inspiring and it gave the Modern History students an insight into the more personal side of that era which is often lost amongst statistics and numbers.

Philosophy

Philosophy students contemplate and evaluate the big questions in life. What is consciousness? Is there a God? How do we live a 'good' life? Challenging problems and dynamic discussion characterised the class as usual. *'Philosophy is a great subject to gain new understanding and insights on all sorts of things, thanks for a great class Carl!'*

Above: Socrates popping by Launceston for a visit.

Below: Tika's Biology and Carl's Philosophy class have a joint discussion on evolution and the origins of life.

Humanities and Behavioural Science

Ancient Civilisations

Students of Ancient Civilisations get the opportunity to explore in-depth one civilisation from the Ancient World. Ancient Greece is a fascinating society to explore; students study government and leadership, art and architecture, warfare and the role of women. Students particularly enjoy looking at Ancient Sparta, a strictly disciplined warlike society that produced soldiers of unmatched strength. Students got a taste of some Spartan training, when they went to the park to practice their battle formations, otherwise known as a 'phalanx'. While the experience was fun for all, most agree our education system is a bit fairer and less harsh. Well done everyone on another great year in Ancient Civilisations.

Asian Studies

Asian Studies is a UTAS/College Program subject new this year. Students have been challenged to consider what Asia is, including behaviours, beliefs and the role the continent plays at a global level. Furthermore, students were required to constantly reflect on their own position within the Asian century. Some areas we have studied include Asian religion and history, attitudes towards education, opportunities for

young people, syncretism of cultures and the impact of geography on spiritualism and economic opportunity. We have also learned just how diverse a place Asia is and that it is a continent of contrasts. To our great pleasure there has been a large focus on food including food production and how climatic change influences food security. We have also reflected on how food is linked to cultural identity. This has involved making and tasting

a lot of food. Dumplings have been a ubiquitous part of our studies! We were lucky enough to be invited to participate in an incentive offered by the Tasmanian and Thai governments called the 'Thai Kitchen' which required that we spend a day in a commercial kitchen learning about and creating Thai dishes with some master chefs from Thailand! It has been a rewarding year that has involved an awful lot of hard work.

Humanities and Behavioural Science

In late May twenty students from the Modern History, Ancient Civilisations, Studies of Religion and Philosophy classes along with three teachers, went to Melbourne for three days. During this time we went to the Melbourne Museum, the Jewish Holocaust Centre, the Islamic Council of Victoria and the Hellenic Museum. Cultural activities including a game of football at the MCG, visiting the Australian Centre for

Melbourne Trip

the Moving Image, wandering through the Queen Victoria Markets and having a bit of free time in the city centre. As we all came from a variety of classes, we learnt a lot about what the other Humanities subjects had to offer as well as furthering our knowledge in those we already studied. We had a wonderful time on the trip and would highly recommend it to future students.

Certificate III in Early Childhood Education and Care

Kimberly Knight and her 17 keen students started in February, worked hard, played hard, and finished with all 17 successfully completing the year achieving Certificate III, thus allowing them to enter the workforce as qualified educators or continue on with their education in Diploma level at TAFE or Degree level at University.

What a year it has been for them all!

Students learned about playing, reading and singing. They learned about policies, work safety and cultural competence. They also learned how to work in a team, be respectful of others and work inclusively with children, staff and families.

Everyone completed around 240 hours of real work in a child care centre with preschoolers, toddlers and babies. Many of our students have been offered paid casual work in child care.

It has been a year filled with challenges and successes and many lovely cakes!

Phoebe Meyer
- Student

Humanities and Behavioural Science

Geography

This year in Geography, the class has studied three key units. Firstly, the study of sustainability and the challenges facing megacities in developing countries, secondly the topic of human impact on land cover change and thirdly a unit on globalisation.

Over the course of the year the class has embarked on several field trips to look at land reclamation in Invermay, the impact of forestry in Tasmania and our role in the global forest economy at a private plantation in North East Tasmania.

"Through geography I've learnt that our actions can help sustain the world but they also have the potential to destroy it." Nadine Lockett (Year 12)

Studies of Religion

Studies of Religion and Religion in Society classes have had a year of exploring the beliefs and rituals of the Islamic world and of Aboriginal Australians. Most of us know little about what Muslims believe, or why land is so important to Aboriginals, and this year has answered many of these questions. It has helped us to develop an understanding beyond the news headlines. A games afternoon with some of LC's Muslim students gave us the opportunity to meet and chat with an Islamic person, and to ask all sorts of questions we were curious about. Likewise, an excursion to the Cataract Gorge with respected Tasmanian Aboriginal Elder, Patsy Cameron, gave us hands on experiences of an ochre ceremony, bush medicine and Dreaming stories. An excursion to Hobart to hear philosopher Peter Vardy got us all thinking about how do we know what is right or wrong, and we finished the year contemplating how the universe came into existence – no question is too big for this class!

Music

Launceston College has a thriving Music Department, with students given many opportunities to expand their creative capabilities over a wide range of subjects including Contemporary Music, Audio Design, Music 3C and UTAS Foundation Practical courses. These courses enable students to learn how to make music, create music, be exposed to music genres and history, theory and notation, as well as learning valuable performance skills and about the music industry in Australia.

Events throughout the year gave students the opportunity to perform to the wider community, the first of which was the annual Awards Ceremony, where Darcy O'Malley provided a musical prelude on Classical Guitar and former student, Zoe Merrington, a vocal solo.

One of the major events in the musical calendar is the Launceston Competitions, where both classical and contemporary musicians, soloists, bands and ensembles take to the stage in a wide range of sections. Launceston College students did extremely well and a full list of place-winners was included in the midyear newsletter. Darcy O'Malley was awarded The Launceston City Council Award for Artistic Excellence for a solo competitor, Nikia Breen won the Charles Bartlett trophy for the Modern Vocal Solo and Beth Hinds won the Junior Vocal Championship.

There have been several special visitors to the Music Department this year, including visiting music conductor Mark Eager, whose career includes being previous principal trombone of the BBC Orchestra

Wales and conductor of the Welsh Sinfonia. He visited from the UK to give masterclasses and talks to students from Music 2, 3 and UTAS Foundation Practical.

Audio Engineer Duncan Underwood, whose career has involved working with Cirque du Soleil, was another special guest to the Audio department. He told students about his life in the industry and shared his knowledge of audio and mixing.

Student Profile

Year 12 student Beth Hinds is a classical soprano singer studying Music 3 and UTAS Foundation Practical Advanced Performance. She believes that *"the highlight of Music 3 is the opportunity to perform and hear others perform in a supportive and encouraging environment."* Beth also performed as solo soprano with the LC Symphonic Band in Geelong and Hobart.

Left: Travis Parkinson, Harry Sondergeld, Connor Claridge, Jack McLaine, Adam Langridge, Victor Wilson and Ashleigh Steven rehearsing as part of the Dance Fever Band

Vocal Ensemble

Every Thursday lunch time this year, a group of over twenty students gathered in the music rooms to make music as the Launceston College Vocal Ensemble. The ensemble is directed by Jenny Bakun, with music tutor Robert Allen providing the piano accompaniment. It gives students the opportunity to learn to sing from music scores, have fun working in an ensemble environment and perform to the wider community. Performances this year have included: winning the shield for Champion Choir 19 Years and Under at the Launceston Competitions at the end of May, singing the Swahili peace song, *Amani*, at *Dance Fever* in September, and the Graduation Ceremony in November.

Symphonic Band

Launceston College Symphonic Band, directed by Peter Quigley, is made up of musicians from Launceston College, local schools and the community. It has been one of the biggest years for the band, making the history books as the first Northern Tasmanian band to compete in the A Grade section for the Tasmanian Band Championships in Hobart on 12 September.

As well as rehearsing for the love of making music every Thursday afternoon, the band has performed many times this year. These have included: the Launceston Competitions, with the band gaining a score of 98 out a possible 100; the Evandale ANZAC Day Ceremony; Victorian Schools Band Festival in Geelong on 8 and 9 August, winning the platinum shield, performing in the finale concert and participating in a conductors' workshop with Dr Kevin Cameron and the Beijing Youth Palace Wind Symphony; and also taking out the Open D grade and Junior C grade shields Tasmanian Band Championships.

Visual Arts

Visual Arts

The Visual Arts Department gives LC Students the opportunity to express themselves through different art mediums including photography, art and graphic design. Level two students explore a range of art genres and techniques, whilst pre-tertiary art students work towards creating an exhibition of work to display as part of their final assessment.

An exciting event on the Visual Arts scene was a visit on 13 August by the Artists in Residence of Art Skool, Mel Fidler and Paul Eggins, who shared their work with staff and students. They gave talks and masterclasses, and ran workshops, and worked with students to install paste ups to make a mural within the Art Department.

Also on 24 August was the major visual art event of the College's calendar: the LC Biennale. This involved a major exhibition of students' art work, both level 2 and 3, from all areas of art, photography and graphic design, including interpretations of art by other art disciplines of music, drama and dance. The night was a great success and a wonderful experience for students - "a celebration of art in all its many forms." Kate Camm, (Art Teacher)

Seve De Angelis and Alex Hancock are both Year 12 students, studying Art Studio Practice this year. They are currently preparing for their end of year exhibitions, with Seve focussing on self-portraits and alter-egos through the use of colours as a mask for darker imagery, and Alex creating animated portraits of strangers, using rotoscope on video frames.

Claire Farrell - Student

"I have always just tried to present myself, thoughts and emotions visually. Typically now my art reflects things that I think about a lot and want others to see." - Alex

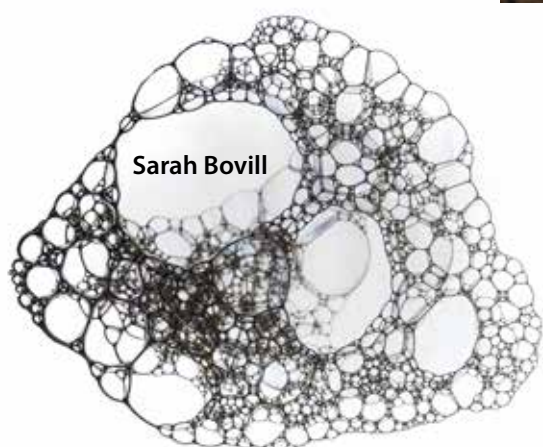

"Some people see art as an outlet for expression, others use it to create an image for themselves through their art. I see it as something I enjoy and something that reflects me as a person." - Seve

Media

Media Production at Launceston College provides an insight into the concepts and technology that fuels the constant flow of visual and audio media information that surrounds us. The College boasts the state's only live to air Student Radio Station, LCFM, and a range of contemporary film production facilities and equipment. Media Studies is streamed into Radio and Video lines, offering both foundation and pre-tertiary courses. Understanding and using media is increasingly central in all our lives, and offers an industry pathway within design, broadcast production and the entertainment industry.

The year in the Media Department began with a visit from Australian filmmaker, Oliver West, holding a filmmaking master class for Video Media students. Students were able to examine indoor and outdoor lighting techniques and finer points of camerawork, and hear about Oliver's experiences in the industry.

Media students also played a big part in the promotion of 2015's Production *Bring It On*. The Production VLOG, followed the progress of the cast and crew as the 2015 production neared its season at the Princess Theatre.

During Terms 3 and 4 the Media Department also collaborated with Cityprom to complete anti-shoplifting advertisements, films for pre-tertiary folios and the Mystate film competition. LC Media students were on hand to film 'Dance Fever' and the Graduation and Awards Ceremony.

In all, a creative and busy year.
